Eden and the Fall: The Fallacies of Radical Ecology By Dr Matt Buttsworth

Eden and the Fall – The Fallacies of Radical Ecological History is a world history analysis book by Dr Matt Buttsworth which is a hard hitting, detailed expose of how radical ecologists uses history to recruit and motivate their followers. It shows that their models of history are profoundly anti-Western and apocalyptic varying only in who they blame for the current ecological crisis. It goes on to prove emphatically not only that their models of history are deeply flawed and factually false, but that the ancestors of this model, including Nazism, were extremely dangerous. It therefore argues that the use of such models of history should be abandoned entirely in favor of a moderate pragmatic ecological stance that focuses on trying to find the best way to solve specific ecological problems.
