

### **Nutritional Composition of Fruit Cultivars**

From Academic Press

#### **Nutritional Composition of Fruit Cultivars** From Academic Press

Nutritional Composition of Fruit Cultivars provides readers with the latest information on the health related properties of foods, making the documentation of the nutritive value of historical cultivars especially urgent, especially before they are lost and can't be effectively compared to modern cultivars.

Because there is considerable diversity and a substantial body of the compositional studies directed towards commercial varieties, this information is useful for identifying traits and features that may be transposed from one variety to another.

In addition, compositional and sensory features may also be used for commercialization and to characterize adulteration. Detailed characterization of cultivars can be used to identify "super-foods". Alternatively, unmasked historical cultivars may be the focus of reinvigorated commercial practices.

Each chapter in this book has sections on the botanical aspects, the composition of traditional or ancient cultivars, the composition of modern cultivars, a focus on areas of research, the specialty of the communicating author of each chapter, and summary points.

- Presents the botanical aspects and composition of both traditional and modern plants, including in-depth insight into current research, and overall summary points for each fruit for consistent comparison and ease of reference
- Provides important information in the consideration of preservation, transference, or re-introduction of historical/traditional cultivars into current crop science
- Provides details on compositional and sensory parameters, from aroma and taste to micro- and macronutrients
- Includes data on nutraceuticals and novel components that have proven to impact on, or be important in, food quality, storage, processing, storage, and marketing

About the Author

Professor Monique S.J. Simmonds OBE FSB FWI FRES FLS

Website: www.plantcultures.org.uk

Position:Director of Kew Innovation Unit, Deputy Keeper & Head of Sustainable Uses of Plants Group, Jodrell Laboratory, Royal Botanic Gardens, Kew, Richmond, Surrey, UK.

Qualifications and appointments:

- •BSc (Hons), Univ. Leeds
- •PhD, Birkbeck College, Univ. London
- •Fellow Royal Society of Entomology
- •Fellow World Innovation Foundation
- •Fellow of the Society of Biology
- •Fellow of the Linnean Society
- •Member of the College of Medicine
- •Member of Darwin Initiative Advisory Committee
- •Member of Science Advisory Board for the Forestry Commission
- •Member of Scientific Advisor Board for International Foundation of Science
- •Elected Director of the Association of Good Practise in traditional Chinese medicine
- •Editor-in-Chief, Biochemical Systematics and Ecology
- •Editorial Board, Phytotherapy Research, Physiological Entomology, Journal of Tropical Medicinal Plants, Natural Product Communications
- •Awarded OBE for services to science, the environment, technological innovation and community

#### Role:

I research the traditional and economic uses of plants and fungi, their potential as cosmetic, novel food, pharmaceutical and agrochemical leads, and as sources of sustainably-harvested products. The research also involves the authentication of plants entering the trade as well as assisting different enforcement authorities identify plants.

I have a long-term interest in furthering our understanding of the role plant-derived compounds play in plant-animal interactions, especially their role in the host selection behaviour of insects. This fundamental knowledge can assist with the identification of plant-derived compounds that have use in pest control as well as in pharmaceutical research. As Deputy Director of Science I play a leading role in the co-ordination of projects with different business sectors that promote and utilise plant and fungal-based solutions to meet current global challenges.

Furthering our knowledge about the historical uses and potential new uses of plants assists support plant conservation and it is vital that there is dissemination of this knowledge in ways that engage with the public, especially the young. The majority of the work of this group is funded through research grants and commercial contracts.

As Deputy Director of Science I am involved in the development and implementation of a new science strategy for Kew, to focus and enhance its world-leading science and conservation work, strengthen its position as a global resource for plant and fungal knowledge, and promote plant and fungal-based solutions to current global challenges.

Victor R. Preedy BSc, PhD, DSc, FRSB, FRSPH, FRCPath, FRSC is a senior member of King's College London. He is also Director of the Genomics Centre and a member of the Faculty of Life Sciences and Medicine.

Professor Preedy has longstanding academic interests in substance misuse especially in relation to health and well being. He is a member of the Editorial Board of Drug and Alcohol Dependence and a founding member of the Editorial Board of Addiction Biology. In his career Professor Preedy was Reader at the Addictive Behaviour Centre at The University of Roehampton, and also Reader at the School of Pharmacy (now part of University College London; UCL). Professor Preedy is Editor of the influential works The Handbook Of Alcohol Related Pathology, The Neuropathology of Drug Addictions and Substance Misuse and The Handbook of Cannabis and Related Pathologies (all published by Academic Press-Elsevier).

Professor Preedy graduated in 1974 with an Honours Degree in Biology and Physiology with Pharmacology. He gained his University of London PhD in 1981. In 1992, he received his Membership of the Royal College of Pathologists and in 1993 he gained his second doctoral degree (DSc). Professor Preedy was elected as a Fellow of the Institute of Biology in 1995 and also as a Fellow to the Royal College of Pathologists in 2000. He was then elected as a Fellow of the Royal Society for the Promotion of Health (2004) and The Royal Institute of Public Health and Hygiene (2004). In 2009, Professor Preedy became a Fellow of the Royal Society for Public Health and in 2012 a Fellow of the Royal Society of Chemistry.

To his credit, Professor Preedy has published over 600 articles, which includes peer-reviewed manuscripts based on original research, abstracts and symposium presentations, reviews and numerous books and volumes.

#### **Users Review**

#### From reader reviews:

#### **Lisa Jennings:**

Nowadays reading books be a little more than want or need but also become a life style. This reading addiction give you lot of advantages. Associate programs you got of course the knowledge your information inside the book in which improve your knowledge and information. The data you get based on what kind of guide you read, if you want send more knowledge just go with education books but if you want sense happy read one together with theme for entertaining for instance comic or novel. The particular Nutritional Composition of Fruit Cultivars is kind of guide which is giving the reader unstable experience.

#### **Ezra Talbott:**

Information is provisions for anyone to get better life, information today can get by anyone at everywhere. The information can be a know-how or any news even restricted. What people must be consider while those information which is from the former life are challenging to be find than now is taking seriously which one is suitable to believe or which one typically the resource are convinced. If you get the unstable resource then you obtain it as your main information we will see huge disadvantage for you. All those possibilities will not happen with you if you take Nutritional Composition of Fruit Cultivars as the daily resource information.

#### **Audrey Stockman:**

This Nutritional Composition of Fruit Cultivars is new way for you who has interest to look for some information because it relief your hunger of knowledge. Getting deeper you onto it getting knowledge more you know or perhaps you who still having small amount of digest in reading this Nutritional Composition of Fruit Cultivars can be the light food for yourself because the information inside that book is easy to get by anyone. These books build itself in the form and that is reachable by anyone, yeah I mean in the e-book contact form. People who think that in book form make them feel drowsy even dizzy this book is the answer. So you cannot find any in reading a e-book especially this one. You can find actually looking for. It should be here for you actually. So , don't miss this! Just read this e-book kind for your better life and knowledge.

#### Nancy Kidder:

As a student exactly feel bored to reading. If their teacher inquired them to go to the library or to make summary for some e-book, they are complained. Just tiny students that has reading's internal or real their leisure activity. They just do what the professor want, like asked to go to the library. They go to right now there but nothing reading critically. Any students feel that reading through is not important, boring and can't see colorful images on there. Yeah, it is to get complicated. Book is very important for you. As we know that on this period, many ways to get whatever we wish. Likewise word says, many ways to reach Chinese's country. So, this Nutritional Composition of Fruit Cultivars can make you feel more interested to read.
