Radiological Anatomy for the FRCR Part 1 By Vimal Raj, Tristan Barrett

The FRCR examination was recently changed and now comprises two modules: physics and radiological anatomy. The anatomy module is new, and consists of 20 radiological images, with 5 questions on each image, 100 questions in all.

'Radiological Anatomy for the FRCR Part 1' is the perfect revision aid for the exam - it contains five mock tests in the same format as the actual exam, so 100 images in total and 500 questions. The authors provide explanatory answers, and have also included extra images to accompany their explanations. In addition there are references to key revision resources, and they have also given advice on exam technique.

They have first hand experience of running courses on the new format FRCR anatomy exam, and are therefore the perfect authors for the subject.
