Radiation Processing of Polymer Materials and Its Industrial Applications

By Keizo Makuuchi, Song Cheng

Get Print Book

Up-to-date, comprehensive coverage on radiation-processed polymer materials and their applications

Offering a unique perspective of the industrial and commercial applications of the radiation processing of polymers, this insightful reference examines the fundamental scientific principles and cutting-edge developments advancing this diverse field. Through a variety of case studies, detailed examples, and economic feasibility analysis, *Radiation Processing of Polymer Materials and Its Industrial Applications* systematically explains the commercially viable ways to process and use radiation-processed polymeric materials in industrial products. In addition, this one-of-kind text:

- Covers important chemistry and processing fundamentals, while emphasizing their translation into practical applications of radiation-processed polymers
- Incorporates new applications in nanotechnology, biomaterials, and recycling
- Systematically discusses new developments in the field and summarizes past achievements

By helping readers—from students to scientists, engineers, technicians, and sales and marketing professionals—understand and solve problems associated with radiation processing of polymers, *Radiation Processing of Polymer Materials and Its Industrial Applications* serves as an essential reference and fills an important gap in the literature.

About the Author

KEIZO MAKUUCHI is the Representative of EB System Consulting Office and an internationally renowned expert in the field of radiation chemistry and radiation processing of polymers. Dr. Makuuchi worked for Japan Atomic Energy Research Institute and EB System Corporation for forty years. He has authored or coauthored ten books on radiation chemistry and has contributed to more than 200 scientific publications.

SONG CHENG is the founder of Song Cheng International, a consulting company. He has over fourteen years of extensive experience in radiation processing of polymer materials. Mr. Cheng is the author of over twenty journal articles and is the inventor of six patents.

Users Review

From reader reviews:

Jean Fuller:

Nowadays reading books be a little more than want or need but also work as a life style. This reading habit give you lot of advantages. Associate programs you got of course the knowledge your information inside the book in which improve your knowledge and information. The data you get based on what kind of publication you read, if you want attract knowledge just go with education and learning books but if you want sense happy read one along with theme for entertaining including comic or novel. The particular Radiation Processing of Polymer Materials and Its Industrial Applications is kind of reserve which is giving the reader

unpredictable experience.

Dana Hanley:

Reading a e-book tends to be new life style on this era globalization. With examining you can get a lot of information that will give you benefit in your life. Along with book everyone in this world can certainly share their idea. Books can also inspire a lot of people. A lot of author can inspire their own reader with their story or perhaps their experience. Not only the storyline that share in the ebooks. But also they write about the knowledge about something that you need case in point. How to get the good score toefl, or how to teach children, there are many kinds of book that you can get now. The authors these days always try to improve their talent in writing, they also doing some exploration before they write to the book. One of them is this Radiation Processing of Polymer Materials and Its Industrial Applications.

Adam Perlman:

Are you kind of stressful person, only have 10 as well as 15 minute in your day to upgrading your mind skill or thinking skill perhaps analytical thinking? Then you are experiencing problem with the book when compared with can satisfy your short period of time to read it because all this time you only find guide that need more time to be go through. Radiation Processing of Polymer Materials and Its Industrial Applications can be your answer since it can be read by you actually who have those short free time problems.

Craig Nazario:

You could spend your free time to see this book this book. This Radiation Processing of Polymer Materials and Its Industrial Applications is simple to create you can read it in the park, in the beach, train along with soon. If you did not have got much space to bring often the printed book, you can buy the particular e-book. It is make you easier to read it. You can save often the book in your smart phone. Therefore there are a lot of benefits that you will get when you buy this book.
