Multilevel Modeling Using R (Chapman & Hall/CRC Statistics in the Social and Behavioral Sciences) By W. Holmes Finch, Jocelyn E. Bolin, Ken Kelley

A powerful tool for analyzing nested designs in a variety of fields, multilevel/hierarchical modeling allows researchers to account for data collected at multiple levels. **Multilevel Modeling Using R** provides you with a helpful guide to conducting multilevel data modeling using the R software environment.

After reviewing standard linear models, the authors present the basics of multilevel models and explain how to fit these models using R. They then show how to employ multilevel modeling with longitudinal data and demonstrate the valuable graphical options in R. The book also describes models for categorical dependent variables in both single level and multilevel data. The book concludes with Bayesian fitting of multilevel models. For those new to R, the appendix provides an introduction to this system that covers basic R knowledge necessary to run the models in the book.

Through the R code and detailed explanations provided, this book gives you the tools to launch your own investigations in multilevel modeling and gain insight into your research.

Editorial Review

Review

"… it could help someone transitioning to R from some other software to analyze data as they were accustomed. It is easy enough to find very specific things in the text …"
?*The American Statistician*, August 2015

About the Author

W. Holmes Finch is a professor in the Department of Educational Psychology at Ball State University, where he teaches courses on factor analysis, structural equation modeling, categorical data analysis, regression, multivariate statistics, and measurement to graduate students in psychology and education. Dr. Finch is also an Accredited Professional Statistician (PStat®). He earned a PhD from the University of South Carolina. His research interests include multilevel models, latent variable modeling, methods of prediction and classification, and nonparametric multivariate statistics.

Jocelyn E. Bolin is an assistant professor in the Department of Educational Psychology at Ball State University, where she teaches courses on introductory and intermediate statistics, multiple regression analysis, and multilevel modeling to graduate students in social science disciplines. Dr. Bolin is a member of the American Psychological Association, the American Educational Research Association, and the American Statistical Association and is an Accredited Professional Statistician (PStat®). She earned a PhD in educational psychology from Indiana University Bloomington. Her research interests include statistical methods for classification and clustering and use of multilevel modeling in the social sciences.

Ken Kelley is the Viola D. Hank Associate Professor of Management in the Mendoza College of Business at the University of Notre Dame. Dr. Kelley is also an Accredited Professional Statistician (PStat®) and associate editor of *Psychological Methods*. His research involves the development, improvement, and evaluation of quantitative methods, especially as they relate to statistical and measurement issues in applied research. He is the developer of the MBESS package for the R statistical language and environment.

Users Review

From reader reviews:

Todd Goff:

As people who live in the actual modest era should be change about what going on or information even knowledge to make these people keep up with the era which is always change and progress. Some of you maybe can update themselves by examining books. It is a good choice for yourself but the problems coming to you actually is you don't know which you should start with. This Multilevel Modeling Using R (Chapman & Hall/CRC Statistics in the Social and Behavioral Sciences) is our recommendation to make you keep up with the world. Why, because book serves what you want and need in this era.

Martina White:

A lot of people always spent their very own free time to vacation as well as go to the outside with them family or their friend. Did you know? Many a lot of people spent these people free time just watching TV, or maybe playing video games all day long. If you would like try to find a new activity that's look different you can read any book. It is really fun for you. If you enjoy the book that you simply read you can spent the whole day to reading a guide. The book Multilevel Modeling Using R (Chapman & Hall/CRC Statistics in the Social and Behavioral Sciences) it is extremely good to read. There are a lot of those who recommended this book. We were holding enjoying reading this book. When you did not have enough space to create this book you can buy the actual e-book. You can m0ore easily to read this book from a smart phone. The price is not to cover but this book provides high quality.

Lewis Wade:

A lot of book has printed but it differs. You can get it by online on social media. You can choose the most effective book for you, science, comedian, novel, or whatever simply by searching from it. It is known as of book Multilevel Modeling Using R (Chapman & Hall/CRC Statistics in the Social and Behavioral Sciences). Contain your knowledge by it. Without making the printed book, it could add your knowledge and make an individual happier to read. It is most important that, you must aware about reserve. It can bring you from one location to other place.

Barbara Wheat:

Reserve is one of source of know-how. We can add our expertise from it. Not only for students and also native or citizen need book to know the upgrade information of year for you to year. As we know those books have many advantages. Beside we add our knowledge, can bring us to around the world. From the book Multilevel Modeling Using R (Chapman & Hall/CRC Statistics in the Social and Behavioral Sciences) we can take more advantage. Don't one to be creative people? To be creative person must choose to read a book. Simply choose the best book that suited with your aim. Don't become doubt to change your life with this book Multilevel Modeling Using R (Chapman & Hall/CRC Statistics in the Social and Behavioral Sciences). You can more inviting than now.
