Design-Type Research in Information Systems: Findings and Practices

By Rustam Vahidov

Design-Type Research in Information Systems: Findings and Practices By Rustam Vahidov

Design-type research deals with the multidisciplinary issues of methodology of design, design principles and guidelines, and philosophy of design with the aim of producing knowledge that aids designers in becoming more effective and efficient.

Design-Type Research in Information Systems: Findings and Practices aims to demonstrate that Design-Type Research is a legitimate scientific activity, particularly in the context of the field of Information Systems. Contending that the philosophy, methodology and principles of traditional science also apply to design-type of science, the research contained within this book is important to the widespread acceptance and promotion of design-type research.

Editorial Review

About the Author

Rustam Vahidov is an Associate Professor of Management Information Systems at the Department of Decision Sciences and MIS, John Molson School of Business, Concordia University (Montreal, Quebec, Canada). He received his Ph.D. from Georgia State University in 2000. Dr. Vahidov has published papers in a number of academic journals, including *Journal of MIS, Decision Support Systems, Information and Management, E-Commerce Research and Applications, IEEE Transactions on Systems, Man and Cybernetics, Fuzzy Sets and Systems*, and several others. His primary research interests include: decision support systems, design science research, software agents, e-commerce systems, distributed artificial intelligence and multi-agent systems, negotiation systems, data mining, fuzzy logic, and genetic algorithms.

Users Review

From reader reviews:

Michael Bradley:

Information is provisions for those to get better life, information currently can get by anyone from everywhere. The information can be a knowledge or any news even a concern. What people must be consider any time those information which is from the former life are hard to be find than now is taking seriously which one would work to believe or which one typically the resource are convinced. If you obtain the unstable resource then you get it as your main information we will see huge disadvantage for you. All of those possibilities will not happen with you if you take Design-Type Research in Information Systems: Findings and Practices as your daily resource information.

Paul Kindig:

Reading a reserve can be one of a lot of pastime that everyone in the world really likes. Do you like reading book consequently. There are a lot of reasons why people enjoyed. First reading a guide will give you a lot of new facts. When you read a e-book you will get new information simply because book is one of many ways to share the information or their idea. Second, examining a book will make you more imaginative. When you studying a book especially fictional works book the author will bring you to imagine the story how the personas do it anything. Third, you are able to share your knowledge to others. When you read this Design-Type Research in Information Systems: Findings and Practices, you can tells your family, friends as well as soon about yours book. Your knowledge can inspire the others, make them reading a publication.

Maria Swensen:

Your reading sixth sense will not betray you, why because this Design-Type Research in Information Systems: Findings and Practices reserve written by well-known writer who knows well how to make book

that may be understand by anyone who have read the book. Written within good manner for you, dripping every ideas and writing skill only for eliminate your hunger then you still skepticism Design-Type Research in Information Systems: Findings and Practices as good book not only by the cover but also by content. This is one publication that can break don't evaluate book by its include, so do you still needing another sixth sense to pick this!? Oh come on your looking at sixth sense already told you so why you have to listening to one more sixth sense.

Sue Joseph:

In this era globalization it is important to someone to obtain information. The information will make a professional understand the condition of the world. The health of the world makes the information simpler to share. You can find a lot of referrals to get information example: internet, newspaper, book, and soon. You can view that now, a lot of publisher in which print many kinds of book. The actual book that recommended to you is Design-Type Research in Information Systems: Findings and Practices this reserve consist a lot of the information in the condition of this world now. This book was represented how does the world has grown up. The language styles that writer use to explain it is easy to understand. Often the writer made some exploration when he makes this book. Here is why this book suited all of you.
