Editorial Review

From the Back Cover

The new, updated edition of the leading book on building construction

This new edition of the bestselling reference, *Fundamentals of Building Construction: Materials and Methods* provides the complete, up-to-date coverage of building construction practices that thousands of professionals and students of architecture, engineering, and construction technology have been relying on for years. Using the new International Building Code® as its basis, this classic guidebook covers the complete range of construction activities, from excavating and foundations to cladding and interior finishes. It's organized around a detailed treatment of the structural systems most widely used in North America: heavy timber, wood light frame, masonry, steel, light gauge steel, and reinforced and precast concrete.

New features of this Fourth Edition include:

- Detailed consideration throughout the book of issues of sustainability and "green" building
- A set of illustrated essays, "From Concept to Reality," that demonstrate how technical decisions are made in real-world building projects
- References to key Web sites for the latest construction information
- Dozens of new photorealistic drawings, photographs, and drawings
- A companion Web site that includes learning resources complementing the book

Fundamentals of Building Construction, Fourth Edition makes available to students and professionals an array of construction information that is unprecedented in scope and quality.

About the Author

EDWARD ALLEN has taught for more than thirty years as a faculty member at the Massachusetts Institute of Technology and Yale University, and as an invited guest at institutions in the U.S., South America, Europe, and Asia. He is a Fellow of the American Institute of Architects.
