Advanced Statistical Methods for the Analysis of Large Data-Sets (Studies in Theoretical and Applied Statistics) From Springer

The theme of the meeting was "Statistical Methods for the Analysis of Large Data-Sets". In recent years there has been increasing interest in this subject; in fact a huge quantity of information is often available but standard statistical techniques are usually not well suited to managing this kind of data. The conference serves as an important meeting point for European researchers working on this topic and a number of European statistical societies participated in the organization of the event.

The book includes 45 papers from a selection of the 156 papers accepted for presentation and discussed at the conference on "Advanced Statistical Methods for the Analysis of Large Data-sets."

Editorial Review

From the Back Cover

Many research studies in the social and economic fields regard the collection and analysis of large amounts of data. These data sets vary in their nature and complexity, they may be one-off or repeated, they may be hierarchical, spatial or temporal. Examples include textual data, transaction-based data, medical data and financial time-series. Standard statistical techniques are usually not well suited to manage this type of data and many authors have proposed extensions of classical techniques or completely new methods. The huge size of these data-sets and their complexity require new strategies of analysis sometimes subsumed under the terms "data mining" or "predictive analytics". This volume contains a peer review selection of papers, whose preliminary version was presented at the international meeting of the Italian Statistical Society "Statistical Methods for the analysis of large data-sets". It collects new ideas, methods and original applications to deal with the complexity and high dimensionality of data.

About the Author
Agostino Di Ciaccio and **Mauro Coli** are the former President of the Programme Committee and President of the Organizing Committee, respectively and were involved in the selection of the papers. **Jose Miguel Angulo Ibañez** is the Editor chosen from the Editorial Board of the Series and is President of the SEIO.

Users Review

From reader reviews:

Henry Knight:

This Advanced Statistical Methods for the Analysis of Large Data-Sets (Studies in Theoretical and Applied Statistics) book is just not ordinary book, you have it then the world is in your hands. The benefit you obtain by reading this book is usually information inside this publication incredible fresh, you will get information which is getting deeper a person read a lot of information you will get. This Advanced Statistical Methods for the Analysis of Large Data-Sets (Studies in Theoretical and Applied Statistics) without we comprehend teach the one who studying it become critical in considering and analyzing. Don't always be worry Advanced Statistical Methods for the Analysis of Large Data-Sets (Studies in Theoretical and Applied Statistics) can bring any time you are and not make your tote space or bookshelves' turn out to be full because you can have it with your lovely laptop even cell phone. This Advanced Statistical Methods for the Analysis of Large Data-Sets (Studies in Theoretical and Applied Statistics) having good arrangement in word in addition to layout, so you will not feel uninterested in reading.

Taylor Becker:

Playing with family within a park, coming to see the water world or hanging out with buddies is thing that usually you might have done when you have spare time, subsequently why you don't try matter that really opposite from that. One activity that make you not sense tired but still relaxing, trilling like on roller coaster

you are ride on and with addition info. Even you love Advanced Statistical Methods for the Analysis of Large Data-Sets (Studies in Theoretical and Applied Statistics), you can enjoy both. It is fine combination right, you still want to miss it? What kind of hangout type is it? Oh can happen its mind hangout men. What? Still don't understand it, oh come on its known as reading friends.

Beverly Rosa:

The book untitled Advanced Statistical Methods for the Analysis of Large Data-Sets (Studies in Theoretical and Applied Statistics) contain a lot of information on it. The writer explains the woman idea with easy approach. The language is very simple to implement all the people, so do certainly not worry, you can easy to read the idea. The book was published by famous author. The author will bring you in the new period of literary works. It is possible to read this book because you can keep reading your smart phone, or program, so you can read the book throughout anywhere and anytime. If you want to buy the e-book, you can wide open their official web-site along with order it. Have a nice study.

Georgia Evans:

As a scholar exactly feel bored to be able to reading. If their teacher asked them to go to the library as well as to make summary for some e-book, they are complained. Just small students that has reading's soul or real their passion. They just do what the professor want, like asked to go to the library. They go to at this time there but nothing reading significantly. Any students feel that looking at is not important, boring in addition to can't see colorful pictures on there. Yeah, it is to be complicated. Book is very important for you. As we know that on this era, many ways to get whatever we really wish for. Likewise word says, many ways to reach Chinese's country. Therefore this Advanced Statistical Methods for the Analysis of Large Data-Sets (Studies in Theoretical and Applied Statistics) can make you sense more interested to read.
