The up-to-DATE guide to name reactions in heterocyclic chemistry

Name Reactions in Heterocyclic Chemistry II presents a comprehensive treatise on name reactions in heterocyclic chemistry, one of the most exciting—and important—fields within organic chemistry today.

The book not only covers fresh ground, but also provides extensive information on new and/or expanded reactions in:

- Three- and four-membered heterocycles
- Five-membered heterocycles (pyrroles and pyrrolidines, indoles, furans, thiophenes, and oxazoles)
- Six-membered heterocycles, including pyridines, quinolines, and isoquinolines

Featuring contributions from the leading authorities in heterocyclic chemistry. Each section includes a description of the given reaction, as well as the relevant historical perspective, mechanism, variations and improvements, synthetic utilities, experimental details, and references to the current primary literature.

The reactions covered in Name Reactions in Heterocyclic Chemistry have been widely adopted in all areas of organic synthesis, from the medicinal/pharmaceutical field, to agriculture, to fine chemicals, and the book brings the most cutting-edge knowledge to practicing synthetic chemists and students, along with the tools needed to synthesize new and useful molecules.

Name Reactions in Heterocyclic Chemistry II By Jie Jack Li Bibliography

- Sales Rank: #2807208 in Books
- Brand: Brand: Wiley
- Published on: 2011-09-13
- Original language: English
- Number of items: 1
- Dimensions: 9.50" h x 1.60" w x 7.80" l, 3.25 pounds
- Binding: Hardcover
- 704 pages

Editorial Review

About the Author

Jie Jack Li is a Chemist at Bristol-Myers Squibb Company. He has authored or edited various books, including the first volume of Name Reactions in Heterocyclic Chemistry, Name Reactions for Functional Group Transformations, Name Reactions for Carbocyclic Ring Formations, and several others, all published by Wiley.

Users Review

From reader reviews:

Donald Taylor:

What do you consider book? It is just for students since they are still students or it for all people in the world, the actual best subject for that? Just you can be answered for that problem above. Every person has various personality and hobby per other. Don't to be forced someone or something that they don't would like do that. You must know how great and important the book Name Reactions in Heterocyclic Chemistry II. All type of book are you able to see on many sources. You can look for the internet resources or other social media.

Derrick Minor:

The book with title Name Reactions in Heterocyclic Chemistry II contains a lot of information that you can discover it. You can get a lot of help after read this book. This particular book exist new understanding the information that exist in this reserve represented the condition of the world at this point. That is important to yo7u to learn how the improvement of the world. This kind of book will bring you throughout new era of the globalization. You can read the e-book on the smart phone, so you can read this anywhere you want.

Edward Cottrell:

A lot of people always spent their particular free time to vacation as well as go to the outside with them loved ones or their friend. Did you know? Many a lot of people spent many people free time just watching TV, or maybe playing video games all day long. If you wish to try to find a new activity this is look different you can read a book. It is really fun for yourself. If you enjoy the book that you read you can spent the entire day to reading a book. The book Name Reactions in Heterocyclic Chemistry II it is rather good to read. There are a lot of folks that recommended this book. These folks were enjoying reading this book. In case you did not have enough space bringing this book you can buy the actual e-book. You can m0ore very easily to read this book out of your smart phone. The price is not to fund but this book has high quality.

Ronda Powers:

Your reading 6th sense will not betray you, why because this Name Reactions in Heterocyclic Chemistry II

e-book written by well-known writer who really knows well how to make book which can be understood by anyone who all read the book. Written within good manner for you, dripping every idea and writing skill only for eliminate your own personal hunger then you still doubt Name Reactions in Heterocyclic Chemistry II as good book not merely by the cover but also through the content. This is one book that can break don't evaluate book by its handle, so do you still needing another sixth sense to pick this particular!? Oh come on your examining sixth sense already alerted you so why you have to listening to a different sixth sense.
