## Radar System Analysis and Modeling (Artech House Radar Library) By David K Barton

A thorough update to the classic Modern Radar Systems Analysis, this reference is a comprehensive and cohesive introduction to radar systems design and performance estimation. It offers professionals the knowledge they need to specify, evaluate, or apply radar technology in civilian or military systems. This unique resource provides radar engineers with time-saving and effective techniques for their work in such defense-related applications as weapon systems design and electronic warfare. The book presents accurate detection range equations for realistically estimating radar performance in a variety of practical situations. As radar systems evolve, designers, engineers, and analysts can turn to this book again and again to calculate and evaluate systems performance to keep up with the latest advances in radar technology. CD-ROM Included! The accompanying disc contains example calculations, exercise problems, and analysis programs written in MathCad 11 and HTML.
