Quantum Gravity and Entanglement: Space Time is Composed of Quantized Geodesic Harmonic Oscillators By Evan Olsen

Based on the last book *Alpha equal Omega: The Proportionality between order and disorder and the reality of perpetual energy and time travel* published by Rosedog Books. This book goes into new territory where one relates a quantized field equation and the new theory of gravity being a quantized geodesic oscillator and thus a new theory of gravity based on the electromagnetic quantum vacuum. As well more on superconductors, Josephson junctions, perpetual energy (motion), time travel, interstellar travel, antigravity and DNA as a strange attractor and how this relates to quantum entanglement and how quantum entanglement comes from $\alpha=\omega=\delta$ inertia hypothesis (uncertainty is chaos).

Editorial Review

About the Author

Evan Olsen is at the end of a second degree BS.c in physics and has a BS.c Bachelors of science. He has been interested in physics ever since he was a kid. He came up with the idea of Harmony Theory when he was in his first degree in biochemistry class. Evan Olsen enjoys martial arts, movies, running, and cross-country skiing. He is the eldest of two children and lives in Edmonton, Alberta, Canada.

Users Review

From reader reviews:

Crystal Sanchez:

This Quantum Gravity and Entanglement: Space Time is Composed of Quantized Geodesic Harmonic Oscillators usually are reliable for you who want to certainly be a successful person, why. The reason of this Quantum Gravity and Entanglement: Space Time is Composed of Quantized Geodesic Harmonic Oscillators can be one of the great books you must have is usually giving you more than just simple studying food but feed you with information that possibly will shock your preceding knowledge. This book is handy, you can bring it everywhere you go and whenever your conditions at e-book and printed people. Beside that this Quantum Gravity and Entanglement: Space Time is Composed of Quantized Geodesic Harmonic Oscillators giving you an enormous of experience such as rich vocabulary, giving you tryout of critical thinking that we understand it useful in your day action. So , let's have it and enjoy reading.

Janet Medley:

Spent a free time and energy to be fun activity to do! A lot of people spent their down time with their family, or their friends. Usually they accomplishing activity like watching television, planning to beach, or picnic from the park. They actually doing ditto every week. Do you feel it? Do you need to something different to fill your free time/ holiday? May be reading a book can be option to fill your cost-free time/ holiday. The first thing you will ask may be what kinds of book that you should read. If you want to test look for book, may be the book untitled Quantum Gravity and Entanglement: Space Time is Composed of Quantized Geodesic Harmonic Oscillators can be very good book to read. May be it is usually best activity to you.

Albert Guerra:

A lot of people always spent their own free time to vacation or go to the outside with them household or their friend. Did you know? Many a lot of people spent they will free time just watching TV, as well as playing video games all day long. If you wish to try to find a new activity here is look different you can read a book. It is really fun in your case. If you enjoy the book you read you can spent all day every day to reading a book. The book Quantum Gravity and Entanglement: Space Time is Composed of Quantized Geodesic Harmonic Oscillators it is rather good to read. There are a lot of people who recommended this book. These people were enjoying reading this book. In case you did not have enough space to bring this book you can

buy the particular e-book. You can m0ore quickly to read this book from a smart phone. The price is not to cover but this book possesses high quality.

Michael Fischer:

Do you like reading a e-book? Confuse to looking for your preferred book? Or your book has been rare? Why so many issue for the book? But just about any people feel that they enjoy intended for reading. Some people likes reading through, not only science book but novel and Quantum Gravity and Entanglement: Space Time is Composed of Quantized Geodesic Harmonic Oscillators as well as others sources were given information for you. After you know how the good a book, you feel desire to read more and more. Science guide was created for teacher or maybe students especially. Those guides are helping them to put their knowledge. In various other case, beside science book, any other book likes Quantum Gravity and Entanglement: Space Time is Composed of Quantized Geodesic Harmonic Oscillators to make your spare time much more colorful. Many types of book like this one.
