Measures of Interobserver Agreement and Reliability, Second Edition (Chapman & Hall/CRC Biostatistics Series) By Mohamed M. Shoukri

Measures of Interobserver Agreement and Reliability, Second Edition covers important issues related to the design and analysis of reliability and agreement studies. It examines factors affecting the degree of measurement errors in reliability generalization studies and characteristics influencing the process of diagnosing each subject in a reliability study. The book also illustrates the importance of blinding and random selection of subjects.

New to the Second Edition

- New chapter that describes various models for methods comparison studies
- New chapter on the analysis of reproducibility using the within-subjects coefficient of variation
- Emphasis on the definition of the subjects' and raters' population as well as sample size determination

This edition continues to offer guidance on how to run sound reliability and agreement studies in clinical settings and other types of investigations. The author explores two ways of producing one pooled estimate of agreement from several centers: a fixed-effect approach and a random sample of centers using a simple meta-analytic approach. The text includes end-of-chapter exercises as well as a CD-ROM of data sets and SAS code.

Editorial Review

Review

"The new edition of this book includes popular and important new topics on assessing agreement and reliability ... this book is very readable and it contains detailed examples and programming codes that can be easily followed and carried out by practicing statisticians. It is a valuable reference for someone who has limited background on assessing agreement and reliability."

?Huiman X. Barnhart, *Journal of the American Statistical Association*, September 2014, Vol. 109

"There are fairly substantial changes from the first edition. These include more focus on defining the subjects' and raters' populations, the loss of efficiency consequent on categorizing continuous scores, sample size determination, and pooling multicentre studies. Two new chapters are added, one on models for methods comparison studies, and one on the analysis of reproducibility using the within-subjects coefficient of variation. ... Overall the volume provides an accessible introduction to the area, at a sufficient depth for most practitioners."

?David J. Hand, Mathematics Department, Imperial College London, UK, in *International Statistical Review*

Praise for the First Edition:

... an important strength of this text is that it brings together technical results on agreement statistics from a variety of sources, and it often provides information about the precision of the estimates and interval estimates ... this text provides a handy compilation of statistical approaches to interobserver agreement ... biostatisticians ... are likely to find the summary and results to be helpful, and they will want to add this book to their collection.

?Patrick E. Shrout, New York University, *Statistics in Medicine*, Vol. 25, 2006

Mohamed Shoukri is well placed to write this book, as he is one of the foremost current researchers in this field. I recommend it.

?*Journal of the Royal Statistical Society*

The well-written specialized book by Shoukri illustrates the meaning and importance of the measures of interobserver agreement with fun examples. The author is known for clear presentation.

?*Journal of Statistical Computation and Simulation*, Vol. 75, No. 4, April 2005

This book can be recommended...

About the Author

Mohamed M. Shoukri is a principal scientist and the chairman of the Department of Biostatistics, Epidemiology, and Scientific Computing at King Faisal Specialist Hospital & Research Centre. He is also an adjunct professor of biostatistics in the Department of Epidemiology and Biostatistics, Schulich School of Medicine and Dentistry at the University of Western Ontario. Dr. Shoukri is a fellow of the Royal Statistical Society of London and an elected member of the International Statistical Institute.

Users Review

From reader reviews:

Lola Paolucci:

Have you spare time for just a day? What do you do when you have far more or little spare time? Yep, you can choose the suitable activity to get spend your time. Any person spent their spare time to take a stroll, shopping, or went to often the Mall. How about open or even read a book allowed Measures of Interobserver Agreement and Reliability, Second Edition (Chapman & Hall/CRC Biostatistics Series)? Maybe it is for being best activity for you. You realize beside you can spend your time with your favorite's book, you can wiser than before. Do you agree with the opinion or you have additional opinion?

Judy Young:

What do you consider book? It is just for students since they're still students or it for all people in the world, exactly what the best subject for that? Simply you can be answered for that issue above. Every person has distinct personality and hobby for every other. Don't to be obligated someone or something that they don't need do that. You must know how great along with important the book Measures of Interobserver Agreement and Reliability, Second Edition (Chapman & Hall/CRC Biostatistics Series). All type of book are you able to see on many methods. You can look for the internet methods or other social media.

Jeffrey Roybal:

You may spend your free time you just read this book this guide. This Measures of Interobserver Agreement and Reliability, Second Edition (Chapman & Hall/CRC Biostatistics Series) is simple to create you can read it in the park, in the beach, train along with soon. If you did not have got much space to bring the actual printed book, you can buy typically the e-book. It is make you quicker to read it. You can save often the book in your smart phone. Consequently there are a lot of benefits that you will get when you buy this book.

Nancy Lundy:

That reserve can make you to feel relax. This kind of book Measures of Interobserver Agreement and Reliability, Second Edition (Chapman & Hall/CRC Biostatistics Series) was colorful and of course has pictures on there. As we know that book Measures of Interobserver Agreement and Reliability, Second Edition (Chapman & Hall/CRC Biostatistics Series) has many kinds or variety. Start from kids until adolescents. For example Naruto or Investigator Conan you can read and think you are the character on there. Therefore not at all of book are generally make you bored, any it can make you feel happy, fun and unwind. Try to choose the best book to suit your needs and try to like reading in which.
