Equilibrium Statistical Mechanics (Dover Books on Physics) By E. Atlee Jackson, *Physics*

Get Print Book

Ideal as an elementary introduction to equilibrium statistical mechanics, this volume covers both classical and quantum methodology for open and closed systems. Introductory chapters familiarize readers with probability and microscopic models of systems, while additional chapters describe the general derivation of the fundamental statistical mechanics relationships. The final chapter contains 16 sections, each dealing with a different application, ordered according to complexity, from classical through degenerate quantum statistical mechanics. Key features include an elementary introduction to probability, distribution, functions, and uncertainty prior to a discussion of statistical mechanics; a review of the concept and significance of energy, together with a discussion of various models of physical systems. A series of appendixes contains helpful information on Gaussian integrals, the error function, the entropy constant, solutions to problems, and other subjects. A background in integral calculus is assumed, but because material is presented at a reasonable level of complexity, even readers not familiar with quantum mechanics can make use of at least two-thirds of this book. Index. 5 Appendixes. Problems at ends of chapters. Over 100 text figures.

Editorial Review

Users Review

From reader reviews:

Christopher Arredondo:

Have you spare time to get a day? What do you do when you have considerably more or little spare time? Yep, you can choose the suitable activity intended for spend your time. Any person spent their spare time to take a stroll, shopping, or went to often the Mall. How about open or perhaps read a book eligible Equilibrium Statistical Mechanics (Dover Books on Physics)? Maybe it is to be best activity for you. You already know beside you can spend your time with your favorite's book, you can better than before. Do you agree with it is opinion or you have various other opinion?

Margaret Holt:

In this 21st centuries, people become competitive in every way. By being competitive today, people have do something to make them survives, being in the middle of typically the crowded place and notice through surrounding. One thing that oftentimes many people have underestimated the idea for a while is reading. Yeah, by reading a e-book your ability to survive enhance then having chance to stand up than other is high. For you personally who want to start reading some sort of book, we give you that Equilibrium Statistical Mechanics (Dover Books on Physics) book as nice and daily reading publication. Why, because this book is greater than just a book.

Tamiko Harmon:

That reserve can make you to feel relax. That book Equilibrium Statistical Mechanics (Dover Books on Physics) was colorful and of course has pictures on there. As we know that book Equilibrium Statistical Mechanics (Dover Books on Physics) has many kinds or style. Start from kids until teenagers. For example Naruto or Private investigator Conan you can read and feel that you are the character on there. Therefore , not at all of book are make you bored, any it can make you feel happy, fun and chill out. Try to choose the best book for you and try to like reading in which.

Ruth Morefield:

As a scholar exactly feel bored for you to reading. If their teacher questioned them to go to the library in order to make summary for some publication, they are complained. Just minor students that has reading's internal or real their hobby. They just do what the professor want, like asked to the library. They go to at this time there but nothing reading seriously. Any students feel that reading is not important, boring and also can't see colorful pics on there. Yeah, it is to be complicated. Book is very important for yourself. As we

know that on this period, many ways to get whatever we wish. Likewise word says, many ways to reach Chinese's country. Therefore , this Equilibrium Statistical Mechanics (Dover Books on Physics) can make you truly feel more interested to read.
