Editorial Review

About the Author

KATHY WEIDNER ZOEHFELD is a graduate of Mount Holyoke College, in South Hadley, Massachusetts, and University of Michigan Ann Arbor where she decided to put her science degrees to use by writing nonfiction books for kids. Since then she has written over 60 natural science and history books for young readers, and been awarded honors by the NSTA/CBC, the NCSS/CBC, the American Association for the Advancement of Science, the American Library Association, the IRA/CBC Children's Choice. When she's not reading, researching, writing, or editing, Kathy loves to spend her free time exploring, doing field work, and preparing fossils in the laboratory for her local natural history museums.

Users Review

From reader reviews:

Mark Wolf:

Have you spare time for a day? What do you do when you have far more or little spare time? That's why, you can choose the suitable activity for spend your time. Any person spent all their spare time to take a wander, shopping, or went to the particular Mall. How about open or read a book called National Geographic Readers: Rocks and Minerals? Maybe it is being best activity for you. You realize beside you can spend your time along with your favorite's book, you can better than before. Do you agree with it has the opinion or you have some other opinion?

Marcus Laws:

Do you one of people who can't read satisfying if the sentence chained inside straightway, hold on guys that aren't like that. This National Geographic Readers: Rocks and Minerals book is readable by you who hate those perfect word style. You will find the information here are arrange for enjoyable reading through experience without leaving also decrease the knowledge that want to provide to you. The writer connected with National Geographic Readers: Rocks and Minerals content conveys thinking easily to understand by many people. The printed and e-book are not different in the written content but it just different in the form of it. So , do you continue to thinking National Geographic Readers: Rocks and Minerals is not loveable to be your top listing reading book?

Jeffery Herring:

The reserve with title National Geographic Readers: Rocks and Minerals has a lot of information that you can learn it. You can get a lot of advantage after read this book. This book exist new information the information that exist in this reserve represented the condition of the world now. That is important to yo7u to understand how the improvement of the world. This specific book will bring you with new era of the syndication. You can read the e-book on your smart phone, so you can read it anywhere you want.

Robert Alcock:

This National Geographic Readers: Rocks and Minerals is great book for you because the content which can be full of information for you who always deal with world and still have to make decision every minute. That book reveal it details accurately using great organize word or we can point out no rambling sentences inside. So if you are read this hurriedly you can have whole data in it. Doesn't mean it only offers you straight forward sentences but tough core information with lovely delivering sentences. Having National Geographic Readers: Rocks and Minerals in your hand like having the world in your arm, details in it is not ridiculous 1. We can say that no book that offer you world within ten or fifteen second right but this book already do that. So , this is certainly good reading book. Heya Mr. and Mrs. hectic do you still doubt that?
