**Buddha's Neuronet for Levitation: Opening the Lotus of a Thousand Petals (Fireside (New Leaf/JZK))** By Ramtha

"If we have just discussed the viable science of levitation - in which that you as a heavy, three-dimensional object vibrating according to the hertz of the planet allows you to have the same stability as mass itself - if suddenly you were to change your field, then the mass that you are made up of would change as well. So it would vibrate; you would still be you but you would be vibrating at another frequency. In other words, we can see you and you are still John Doe, but you are not in the world because you are no longer obeying the laws of gravity and physics here. So you are actually levitating fifteen feet above the floor; we can see you, but you are eating the surrounding time in this time. And while you are sitting there, you are actually in the future. You are in another dimension of time that will one day be your linear future." - Ramtha
