Japanese Sentence Processing From Psychology Press

This volume is a direct result of the International Symposium on Japanese Sentence Processing held at Duke University. The symposium provided the first opportunity for researchers in three disciplinary areas from both Japan and the United States to participate in a conference where they could discuss issues concerning Japanese syntactic processing. The goals of the symposium were three-fold:

- * to illuminate the mechanisms of Japanese sentence processing from the viewpoints of linguistics, psycholinguistics and computer science;
- * to synthesize findings about the mechanisms of Japanese sentence processing by researchers in these three fields in Japan and the United States;
- * to lay foundations for future interdisciplinary research in Japanese sentence processing, as well as international collaborations between researchers in Japan and the United States.

The chapters in this volume have been written from the points of view of three different disciplines, with various immediate objectives -- from building usable speech understanding systems to investigating the nature of competence grammars for natural languages. All of the papers share the long term goal of understanding the nature of human language processing mechanisms. The book is concerned with two central issues -- the universality of language processing mechanisms, and the nature of the relation between the components of linguistic knowledge and language processing. This volume demonstrates that interdisciplinary research can be fruitful, and provides groundwork for further research in Japanese sentence processing.

Editorial Review

Review

...contains some interesting psycholinguistic theory and intriguing psycholinguistic experiments, as well as showcasing some artificial intelligence (AI) and linguistic approaches to the distinctive problems of Japanese....opens up the experimental study of filler-gap constructions in Japanese.

—*American Journal of Psychology*

...makes an important contribution, not only to the field of Japanese processing but also to human language processing in general, addressing the issue of whether the parsing mechanism is universal and what parameters are to be incorporated, if any....the book has succeeded in laying an important cornerstone in Japanese sentence-processing research.

—*Studies in Second Language Acquisition*

About the Author

Reiko Mazuka is Head of the Laboratory for Language Development at the RIKEN Brain Science Institute, Japan, and also Associate Professor in the Department of Psychology, Duke University.

Users Review

From reader reviews:

Clifford Walsh:

Have you spare time for a day? What do you do when you have considerably more or little spare time? Yep, you can choose the suitable activity regarding spend your time. Any person spent their very own spare time to take a stroll, shopping, or went to the Mall. How about open or read a book eligible Japanese Sentence Processing? Maybe it is for being best activity for you. You realize beside you can spend your time along with your favorite's book, you can more intelligent than before. Do you agree with the opinion or you have some other opinion?

Latoya Jones:

As people who live in often the modest era should be update about what going on or details even knowledge to make these people keep up with the era which is always change and move forward. Some of you maybe can update themselves by reading through books. It is a good choice for you personally but the problems coming to you actually is you don't know what type you should start with. This Japanese Sentence Processing is our recommendation to make you keep up with the world. Why, because this book serves what you want and want in this era.

James Rohrbach:

Are you kind of stressful person, only have 10 or perhaps 15 minute in your day time to upgrading your mind

ability or thinking skill possibly analytical thinking? Then you are experiencing problem with the book in comparison with can satisfy your short space of time to read it because all of this time you only find reserve that need more time to be learn. Japanese Sentence Processing can be your answer given it can be read by a person who have those short time problems.

Sandra Fritz:

Is it you actually who having spare time after that spend it whole day simply by watching television programs or just lying down on the bed? Do you need something new? This Japanese Sentence Processing can be the respond to, oh how comes? The new book you know. You are thus out of date, spending your extra time by reading in this new era is common not a nerd activity. So what these guides have than the others?
