Understanding Quantitative and Qualitative Research in Early Childhood Education (Early Childhood Education Series (Teachers College Pr)) By William Lawrence Goodwin, Laura D. Goodwin

What are the fundamental elements of good quantitative and qualitative education? What are the strengths and weaknesses of each approach? What does research offer early childhood education? Are quantitative and qualitative approaches compatible? This work presents the research process and its components in a straightforward and accessible manner. Using real examples from early childhood education, William L. Goodwin and Laura D. Goodwin explore various methods of research and show how they may be studied and applied. They examine the major aspects of both quantitative and qualitative paradigms and techniques, stressing the compatibility and complementary nature of the two approaches that are so often seen as mutually exclusive if not contradictory.

Editorial Review

About the Author

William Goodwin is a Senior Lecturer in the Department of Forensic and Investigative Science at the University of Central Lancashire where his main teaching areas are molecular biology and its application to forensic analysis. Prior to this he worked for eight years at the Department of Forensic Medicine and Science in the Human Identification Centre where he was involved in a number of international cases involving the identifications of individuals from air crashes and from clandestine graves. His research has focused on the analysis of DNA from archaeological samples and highly compromised human remains. He has acted as an expert witness and also as a consultant for international humanitarian organisations and forensic service providers.

Adrian Linacre is a Senior Lecturer at the Centre for Forensic Science at the University of Strathclyde where his main areas of teaching are aspects of forensic biology, population genetics and human identification. His research areas include the use of non-human DNA in forensic science and the mechanisms behind the transfer and persistence of DNA at crime scenes. He has published over 50 papers in international journals, has presented at a number of international conferences and is on the editorial board of Forensic Science International: Genetics. Dr Linacre works as an assessor for the Council for the Registration of Forensic Practitioners (CRFP) in the area of human contact traces and is a Registered Practitioner.

Sibte Hadi is a Senior Lecturer in the Department of Forensic and Investigative Science at the University of Central Lancashire. His main teaching areas are Forensic Medicine and DNA profiling. He is a physician by training and practised forensic pathology for a number of years in Pakistan before undertaking a PhD in Forensic Genetics. Following this he worked at the Department of Molecular Biology Louisiana State University as a member of the Louisiana Healthy Aging Study group. He has acted as a consultant to forensic service providers in the USA and Pakistan. His current research is focused on population genetics, DNA databases and gene expression studies for different forensic applications.

Users Review

From reader reviews:

Patrick Pierce:

What do you ponder on book? It is just for students since they are still students or this for all people in the world, the actual best subject for that? Just simply you can be answered for that issue above. Every person has various personality and hobby for every single other. Don't to be pushed someone or something that they don't desire do that. You must know how great along with important the book Understanding Quantitative and Qualitative Research in Early Childhood Education (Early Childhood Education Series (Teachers College Pr)). All type of book are you able to see on many resources. You can look for the internet options or other social media.

Jean Gaskin:

A lot of people always spent their particular free time to vacation or perhaps go to the outside with them friends and family or their friend. Do you know? Many a lot of people spent these people free time just watching TV, or perhaps playing video games all day long. If you wish to try to find a new activity honestly, that is look different you can read any book. It is really fun for you. If you enjoy the book which you read you can spent the entire day to reading a publication. The book Understanding Quantitative and Qualitative Research in Early Childhood Education (Early Childhood Education Series (Teachers College Pr)) it is quite good to read. There are a lot of people that recommended this book. We were holding enjoying reading this book. Should you did not have enough space to develop this book you can buy often the e-book. You can m0ore easily to read this book through your smart phone. The price is not very costly but this book provides high quality.

Marylou Arroyo:

Don't be worry if you are afraid that this book may filled the space in your house, you can have it in e-book method, more simple and reachable. This kind of Understanding Quantitative and Qualitative Research in Early Childhood Education (Early Childhood Education Series (Teachers College Pr)) can give you a lot of good friends because by you investigating this one book you have point that they don't and make you more like an interesting person. This kind of book can be one of one step for you to get success. This reserve offer you information that perhaps your friend doesn't realize, by knowing more than other make you to be great individuals. So , why hesitate? Let me have Understanding Quantitative and Qualitative Research in Early Childhood Education (Early Childhood Education Series (Teachers College Pr)).

Ronald Canty:

A lot of reserve has printed but it is different. You can get it by world wide web on social media. You can choose the very best book for you, science, comedian, novel, or whatever by searching from it.
