Transfusion Medicine and Hemostasis, Second Edition: Clinical and Laboratory Aspects From Brand: Elsevier Science

The second edition of *Transfusion Medicine and Hemostasis* continues to be the only "pocket-size" quick reference for pathology residents and transfusion medicine fellows. It covers all topics in blood banking, transfusion medicine, and clinical and laboratory based coagulation. Short, focused chapters, organized by multiple hierarchical headings, are supplemented with up to 10 suggested reading citations. This single reference covers essentially all the topics required to meet the goals and objectives of a major program in transfusion medicine and clinical coagulation.

New chapters in the coagulation testing section reflect the development of new tests available and their incorporation into clinical practice. Coverage includes essential updates on the importance of new cellular therapies, peripheral blood and bone marrow hematopoietic progenitor cells, as well as cord blood banking and regenerative medicine. The authors also examine advances in the understanding of molecular testing and pathogen reduction in two separate quality control chapters (one for blood centers and one for hospitals).

- Updated content covers new coagulation tests, cellular therapies, and quality control issues
- Easy to use, with focused, well-defined chapters in a standardized format throughout
- Offers quick "cross-reference" lists at the end of each chapter
- Includes lists of common abbreviations and indexes that cross reference diagnostic, clinical and therapeutic commonalities

Editorial Review

Review

"This book truly covers both hemostasis and transfusion medicine and bridges seamlessly between the disciplines, laboratory science, diagnosis (including clinical features), and medical treatment...Each chapter is so well contained and informative, it is like a tempting one-bite appetizer suitable for measured ingestion according to a reader's appetite for and ability to retain new information."--Doody.com, October 4, 2013

"Shaz, Hillyer, Roshal, and Abrams...provide clinical and laboratory information in transfusion medicine and hemostasis for all physicians and allied health professionals who order and administer blood components and specialized factors for hemostatic abnormalities in patients, as well as those who consult and care for these patients."--Reference and Research Book News, August 2013

From the Back Cover

"Given the cross disciplinary nature of transfusion medicine and the intensive focus on transfusion medicine and hemostasis as evidenced by the Transfusion Medicine, Hemostasis Clinical Trials Network sponsored by NHLBI, this textbook is both timely and needed by practitioners in both clinical and laboratory disciplines. The book is written exclusively by faculty of one of the leading programs in transfusion medicine, hemostasis, and hematology and covers important adult and pediatric concepts in these two fields. I know that hematologists, pathologists, and clinicians who depend upon transfusion and hemostatic support will find this novel text interesting and valuable in their practice and teaching efforts."

--Paul M. Ness, MD, Director, Transfusion Medicine, Johns Hopkins Medical Institutions, Professor of Pathology and Medicine & Oncology, Johns Hopkins University, Baltimore, MD, USA

"Few transfusion medicine texts have given such weight and focus to hemostasis. The combination of clinical and laboratory aspects in a concise format is superb. This book will be very useful both for those interested in transfusion medicine and those interested in hemostasis."

-- Ellis Neufeld, MD, PhD, Associate Chief, Division of Hematology/Oncology, Children's Hospital Boston, Associate Professor, Department of Pediatrics, Harvard Medical School, Boston, MA, USA

"This is an outstanding addition to transfusion medicine textbooks. For years we have needed the optimal text for training residents, fellows, and practitioners all in one book. The inclusion of coagulation, laboratory aspects and transfusion medicine was insightful and reflects the multi-disciplinary and clinical identity of Transfusion Medicine."

--Leslie Silberstein, MD, Director, Joint Program in Transfusion Medicine at Children's Hospital Boston, Dana-Farber Cancer Institute, and Brigham and Women's Hospital, Professor of Pathology, Harvard Medical School, Boston, MA, USA

"The book edited by Dr. Christopher Hillyer, Beth Shaz, James Zimring and Thomas Abshire entitled Transfusion Medicine and Hemostasis: Clinical and Laboratory Aspects provides wonderful bite-size comments and clear concise recommendations. This makes for a very practical textbook that should be useful to a wide body of healthcare workers who deal with the use of blood products or patients with

bleeding or thrombosis. The coverage of topics in transfusion medicine and coagulation is broad. This is a major advantage of the textbook that makes it particularly useful. The connection between the underlying pathophysiology and the clinical disorders and the treatment recommendations is at the level of just what you want to know. This book is a winner, and I strongly endorse its use by anyone requiring information in this field."

--Michael Laposata, MD, PhD, Pathologist in Chief, Vanderbilt University Hospital, Professor of Pathology and Medicine, Vanderbilt University, Nashville, TN, USA

About the Author

Chief Medical Officer and Vice President of Medical Programs and Services, New York Blood Center, New York, NY; Clinical Assistant Professor, Department of Pathology and Laboratory Medicine, Emory University School of Medicine, Atlanta, GA. Dr. Shaz is a member of the Board of Directors of AABB and the American Society for Apheresis. She is an associate editor for Transfusion and on the editorial board of the Journal of Clinical Apheresis.

Professor of Medicine, Cornell Weill Medical College, New York, NY. Dr. Hillyer also is the immediate past-president of the American Association of Blood Banking and a trustee of the National Blood Foundation (NBF). He is an associate editor of Transfusion and serves on several other editorial boards including Blood.

Assistant Professor of Pathology and Laboratory Medicine, Weill Cornell Medical College, New York, NY. Dr. Roshal is also Assistant Director of the central laboratory overseeing hematology and special coagulation laboratories.

Associate Chief of Hematology-Oncology and Professor of Medicine, University of Pennsylvania School of Medicine, Philadelphia, PA. Dr. Abrams is the Secretary of American Society of Hematology, and serves on their Executive Committee. He also is a member of the Board of Directors of the American Board of Internal Medicine, and is the Chair of their Hematology Board.

Users Review

From reader reviews:

William Fiscus:

Now a day individuals who Living in the era where everything reachable by match the internet and the resources inside it can be true or not demand people to be aware of each info they get. How individuals to be smart in receiving any information nowadays? Of course the answer then is reading a book. Reading a book can help men and women out of this uncertainty Information particularly this Transfusion Medicine and Hemostasis, Second Edition: Clinical and Laboratory Aspects book because this book offers you rich info and knowledge. Of course the data in this book hundred per-cent guarantees there is no doubt in it you know.

Maritza Berry:

Hey guys, do you wishes to finds a new book to learn? May be the book with the headline Transfusion Medicine and Hemostasis, Second Edition: Clinical and Laboratory Aspects suitable to you? Often the book was written by well known writer in this era. The book untitled Transfusion Medicine and Hemostasis, Second Edition: Clinical and Laboratory Aspectsis the main of several books this everyone read now. This

particular book was inspired many people in the world. When you read this guide you will enter the new dimensions that you ever know before. The author explained their plan in the simple way, and so all of people can easily to comprehend the core of this reserve. This book will give you a lots of information about this world now. To help you see the represented of the world within this book.

Mary Diaz:

Reading a book tends to be new life style in this era globalization. With studying you can get a lot of information that can give you benefit in your life. Together with book everyone in this world can share their idea. Guides can also inspire a lot of people. Lots of author can inspire their particular reader with their story or even their experience. Not only the story that share in the publications. But also they write about advantage about something that you need case in point. How to get the good score toefl, or how to teach your kids, there are many kinds of book which exist now. The authors in this world always try to improve their proficiency in writing, they also doing some exploration before they write for their book. One of them is this Transfusion Medicine and Hemostasis, Second Edition: Clinical and Laboratory Aspects.

Charles Myers:

Many people spending their period by playing outside having friends, fun activity along with family or just watching TV all day long. You can have new activity to spend your whole day by reading through a book. Ugh, you think reading a book really can hard because you have to bring the book everywhere? It all right you can have the e-book, having everywhere you want in your Mobile phone. Like Transfusion Medicine and Hemostasis, Second Edition: Clinical and Laboratory Aspects which is obtaining the e-book version. So , why not try out this book? Let's see.
