By Witold Hurewicz

Lectures on Ordinary Differential Equations (Dover Phoenix Editions) (**Dover Phoneix Editions**) By Witold Hurewicz

🔒 Get Print Book

"A rigorous and lively introduction . . . careful and lucid . . ."--*The American Mathematical Monthly*. Excellent hardcover edition. This concise and idea-rich introduction to a topic of perennial interest in mathematics is written so clearly and lucidly, it is well within the reach of senior mathematics students. It covers mainly existence theorems for first-order scalar and vector equations, basic properties of linear vector equations, and two-dimensional nonlinear autonomous systems. Throughout, the emphasis is on geometric methods. Witold Hurewicz was a world-class mathematician whose untimely death in 1956 deprived the mathematics community of one of its leading lights. His contributions to dimension theory, homotopy and other topics are outlined by Professor Solomon Lefschetz in a prefatory article "Witold Hurewicz in Memoriam" included in this volume. Also included is a list of books on differential equations for those interested in further reading, and a bibliography of Hurewicz's published works.

Editorial Review

From the Back Cover

Hailed by *The American Mathematical Monthly* as "a rigorous and lively introduction," this text explores a topic of perennial interest in mathematics. The author, a distinguished mathematician and formulator of the Hurewicz theorem, presents a clear and lucid treatment that emphasizes geometric methods. Topics include first-order scalar and vector equations, basic properties of linear vector equations, and two-dimensional nonlinear autonomous systems.

Suitable for senior mathematics students, the text begins with an examination of differential equations of the first order in one unknown function. Subsequent chapters address systems of differential equations, linear systems of differential equations, singularities of an autonomous system, and solutions of an autonomous system in the large.

Dover (2014) republication of the edition originally published by MIT Press, Cambridge, Massachusetts, 1958.

About the Author

Witold Hurewicz (1904–56) was Professor of Mathematics at MIT for more than 20 years.

Users Review

From reader reviews:

Jessie Lloyd:

Precisely why? Because this Lectures on Ordinary Differential Equations (Dover Phoenix Editions) (Dover Phoneix Editions) is an unordinary book that the inside of the e-book waiting for you to snap the item but latter it will surprise you with the secret this inside. Reading this book adjacent to it was fantastic author who write the book in such remarkable way makes the content interior easier to understand, entertaining way but still convey the meaning thoroughly. So , it is good for you because of not hesitating having this ever again or you going to regret it. This excellent book will give you a lot of rewards than the other book get such as help improving your expertise and your critical thinking technique. So , still want to delay having that book? If I were being you I will go to the publication store hurriedly.

Shawn Hodgin:

Do you have something that you want such as book? The e-book lovers usually prefer to decide on book like comic, brief story and the biggest an example may be novel. Now, why not seeking Lectures on Ordinary Differential Equations (Dover Phoenix Editions) (Dover Phoneix Editions) that give your entertainment preference will be satisfied by simply reading this book. Reading practice all over the world can be said as the means for people to know world a great deal better then how they react towards the world. It can't be claimed constantly that reading routine only for the geeky man or woman but for all of you who wants to

become success person. So, for all of you who want to start reading through as your good habit, you are able to pick Lectures on Ordinary Differential Equations (Dover Phoenix Editions) (Dover Phoneix Editions) become your own personal starter.

Robert Nichols:

Are you kind of stressful person, only have 10 or perhaps 15 minute in your day time to upgrading your mind skill or thinking skill perhaps analytical thinking? Then you are having problem with the book than can satisfy your short space of time to read it because pretty much everything time you only find guide that need more time to be go through. Lectures on Ordinary Differential Equations (Dover Phoenix Editions) (Dover Phoneix Editions) can be your answer as it can be read by you actually who have those short free time problems.

Teresa Spillman:

In this period of time globalization it is important to someone to receive information. The information will make someone to understand the condition of the world. The healthiness of the world makes the information quicker to share. You can find a lot of sources to get information example: internet, newspaper, book, and soon. You can see that now, a lot of publisher that print many kinds of book. The book that recommended to you personally is Lectures on Ordinary Differential Equations (Dover Phoenix Editions) (Dover Phoneix Editions) this guide consist a lot of the information with the condition of this world now. This particular book was represented how can the world has grown up. The vocabulary styles that writer value to explain it is easy to understand. Often the writer made some study when he makes this book. That's why this book ideal all of you.
