Martin Heidegger's *Contributions to Philosophy* reflects his famous philosophical "turning." In this work, Heidegger returns to the question of being from its inception in *Being and Time* to a new questioning of being as event. Heidegger opens up the essential dimensions of his thinking on the historicity of being that underlies all of his later writings. *Contributions* was composed as a series of private ponderings that were not originally intended for publication. They are nonlinear and radically at odds with the traditional understanding of thinking. This translation presents Heidegger in plain and straightforward terms, allowing surer access to this new turn in Heidegger's conception of being.

Editorial Review

Review

"[This book is] an impressive achievement." ?Notre Dame Philosophical Reviews

"Written during the dark years 1936-1938, these Contributions help us to make the transition from Heidegger's masterpiece, *Being and Time*, to his later thinking. Some of the darkest pages Heidegger wrote are here, and also some of the most brilliant. The translation by Richard Rojcewicz and Daniela Vallega-Neu is judicious and inspired." ?David Farrell Krell, DePaul University

"Contributions is among the most challenging works of our time: rigorous, it is also acrobatic in its leaps and logic; imaginative, it is nonetheless precise; intensely self-reflexive, it engages far-reaching questions. Its greatest challenge though is its language and the new vocabulary it forges. This new translation meets that challenge and so marks a real advance in our understanding of this impossible, yet indispensable book." ?Dennis J. Schmidt, The Pennsylvania State University

"I had tried to study the Contributions before, but I found it impossible. Now, thanks to this new translation, I have access to what may turn out to be the most important philosophical work of our time." ?Bruce Ledewitz, Duquesne University
