Atlas and Synopsis of Lever's Histopathology of the Skin By David E. Elder MB ChB, Rosalie Elenitsas MD, Michael D. Ioffreda MD, Bennett L. Johnson Jr. MD, Jeffrey Miller MD, O. Fred Miller III MD

Based on **Lever's Histopathology of the Skin, Ninth Edition**, this full-color atlas presents an algorithmic pattern recognition approach to differential diagnosis of skin diseases. Whereas **Lever's** classifies diseases by pathogenesis, this atlas aids in differential diagnosis of unknown cases by classifying diseases morphologically, based on their location in the skin and the patterns and cell types seen through the microscope. Within each morphologic category, prototypic disorders are described and illustrated with full-color photomicrographs, and a list of differential diagnostic possibilities is presented. The atlas contains over 1,300 full-color illustrations.

A bound-in image bank CD-ROM contains all the book's illustrations.

Editorial Review

Review

VA Palo Alto Health Care System, Barbara M. Egbert, BS MD -- This concise synopsis of dermatopathology covers the entire subject offering an expanded introduction to diagnosis by pattern analysis. The previous edition was published in 1999. The authors' purpose is to use the concept of pattern analysis for the diagnosis of dermatologic diseases histopathologically. This is an excellent approach to the diagnosis of skin biopsies. The authors have targeted both trainees and more experienced practitioners and the book would be useful to medical students, practicing pathologists and dermatology, medical, and family practice residents. The book covers most aspects of dermatopathology and targets diagnosis by pattern. The book has excellent clinical photographs as well as excellent photomicrographs and some immunofluorescence results. Summary tables are helpful in narrowing down diagnoses. These authors favor the "east coast" view of malignant melanoma, e.g., indicating that lentigo maligna has an atrophic epidermis with large atypical cells at the dermal epidermal junction. Farrahi et al. J Cutan Pathol 2005 Jul 32(6 405-12) showed the variation in patterns in lentigo maligna which may closely mimic dysplastic nevus. The authors add SAMPUS (superficial atypical melanocytic proliferation of uncertain significance), which is a concept not supported throughout the dermatopathologic community. This book would be very useful to practicing pathologists and medical students who wish to quickly grasp the essence of the problem with some histopathologic diagnoses. The illustrations are very helpful in this regard. This second edition, coming after an eight-year hiatus, includes many new positive additions. The most likely competitor would be Practical Dermatopathology, Rapini (Elsevier, 2005). Rapini does not include clinical photographs, but does have excellent photomicrographs and extensive tables. Weighted Numerical Score: 97 - 5 Stars!

Users Review

From reader reviews:

Alyssa Cox:

Book is to be different per grade. Book for children until finally adult are different content. As you may know that book is very important for people. The book Atlas and Synopsis of Lever's Histopathology of the Skin was making you to know about other know-how and of course you can take more information. It is extremely advantages for you. The reserve Atlas and Synopsis of Lever's Histopathology of the Skin is not only giving you more new information but also to become your friend when you truly feel bored. You can spend your own personal spend time to read your reserve. Try to make relationship with all the book Atlas and Synopsis of Lever's Histopathology of the Skin. You never truly feel lose out for everything if you read some books.

Alicia Gentry:

Reading a reserve can be one of a lot of pastime that everyone in the world adores. Do you like reading book thus. There are a lot of reasons why people enjoy it. First reading a guide will give you a lot of new data. When you read a guide you will get new information mainly because book is one of numerous ways to share the information or perhaps their idea. Second, studying a book will make you more imaginative. When you

reading through a book especially fiction book the author will bring one to imagine the story how the characters do it anything. Third, you could share your knowledge to other folks. When you read this Atlas and Synopsis of Lever's Histopathology of the Skin, you can tell your family, friends and soon about your book. Your knowledge can inspire different ones, make them reading a guide.

Derrick Robertson:

Many people spending their time frame by playing outside together with friends, fun activity together with family or just watching TV 24 hours a day. You can have new activity to spend your whole day by reading through a book. Ugh, ya think reading a book can really hard because you have to take the book everywhere? It fine you can have the e-book, getting everywhere you want in your Smart phone. Like Atlas and Synopsis of Lever's Histopathology of the Skin which is obtaining the e-book version. So , try out this book? Let's observe.

Christen Arnold:

Is it you who having spare time then spend it whole day simply by watching television programs or just telling lies on the bed? Do you need something new? This Atlas and Synopsis of Lever's Histopathology of the Skin can be the answer, oh how comes? A fresh book you know. You are consequently out of date, spending your free time by reading in this brand new era is common not a nerd activity. So what these guides have than the others?
