Chemistry: An Atoms-Focused Approach By Thomas R. Gilbert, Rein V. Kirss, Natalie Foster

More than atoms first?atoms focused.

The authors, who have more than two decades of combined experience teaching an atoms-first course, have gone beyond reorganizing the topics. They emphasize the particulate nature of matter throughout the book in the text, art, and problems, while placing the chemistry in a biological, environmental, or geological context. The authors use a consistent problem-solving model and provide students with ample opportunities to practice.

Editorial Review

About the Author

Thomas R. Gilbert has a BS in chemistry from Clarkson and a PhD in analytical chemistry from MIT. After 10 years with the Research Department of the New England Aquarium in Boston, he joined the faculty of Northeastern University, where he is currently associate professor of chemistry and chemical biology. His research interests are in chemical and science education. He teaches general chemistry and science education courses and conducts professional development workshops for K–12 teachers. He has won Northeastern's Excellence in Teaching Award and Outstanding Teacher of First-Year Engineering Students Award. He is a fellow of the American Chemical Society and in 2012 was elected to the ACS Board of Directors.

Rein V. Kirss received both a BS in chemistry and a BA in history as well as an MA in chemistry from SUNY Buffalo. He received his PhD in inorganic chemistry from the University of Wisconsin, Madison, where the seeds for this textbook were undoubtedly planted. After two years of postdoctoral study at the University of Rochester, he spent a year at Advanced Technology Materials, Inc., before returning to academics at Northeastern University in 1989. He is an associate professor of chemistry with an active research interest in organometallic chemistry.

Natalie Foster is emeritus professor of chemistry at Lehigh University in Bethlehem, Pennsylvania. She received a BS in chemistry from Muhlenberg College and MS, DA, and PhD degrees from Lehigh University. Her research interests included studying poly(vinyl alcohol) gels by NMR as part of a larger interest in porphyrins and phthalocyanines as candidate contrast enhancement agents for MRI. She taught both semesters of the introductory chemistry class to engineering, biology, and other nonchemistry majors and a spectral analysis course at the graduate level. She is the recipient of the Christian R. and Mary F. Lindback Foundation Award for distinguished teaching.

Users Review

From reader reviews:

Andrew Waite:

The actual book Chemistry: An Atoms-Focused Approach has a lot of knowledge on it. So when you read this book you can get a lot of advantage. The book was authored by the very famous author. Tom makes some research prior to write this book. This particular book very easy to read you will get the point easily after perusing this book.

Barbie Brookins:

People live in this new time of lifestyle always try to and must have the time or they will get lot of stress from both daily life and work. So , when we ask do people have time, we will say absolutely without a doubt. People is human not only a robot. Then we consult again, what kind of activity are you experiencing when the spare time coming to you actually of course your answer will unlimited right. Then do you try this one, reading publications. It can be your alternative with spending your spare time, the book you have read is actually Chemistry: An Atoms-Focused Approach.

Marjorie Ishee:

A lot of guide has printed but it is different. You can get it by internet on social media. You can choose the most beneficial book for you, science, comic, novel, or whatever by searching from it. It is referred to as of book Chemistry: An Atoms-Focused Approach. You can include your knowledge by it. Without departing the printed book, it may add your knowledge and make you happier to read. It is most crucial that, you must aware about reserve. It can bring you from one place to other place.

Rhonda Lanham:

Reading a book make you to get more knowledge from this. You can take knowledge and information from the book. Book is written or printed or created from each source which filled update of news. On this modern era like today, many ways to get information are available for a person. From media social just like newspaper, magazines, science guide, encyclopedia, reference book, story and comic. You can add your knowledge by that book. Are you ready to spend your spare time to open your book? Or just trying to find the Chemistry: An Atoms-Focused Approach when you needed it?
