Trigonometry (11th Edition) By Margaret L. Lial, John Hornsby, David I. Schneider, Callie Daniels

For courses in trigonometry.

Steadfast Support for your Evolving Course

The **College Algebra** series, by Lial, Hornsby, Schneider, and Daniels, combines the experience of master teachers to help students develop both the conceptual understanding and the analytical skills necessary for success in mathematics. With this latest edition, the authors respond to the challenges of new student expectations and new classroom models. The Lial team is now offering a new suite of resources to support today's instructors and students.

Note: You are purchasing a standalone product; MyMathLab does not come packaged with this content. Students, if interested in purchasing this title with MyMathLab, ask your instructor for the correct package ISBN and Course ID. Instructors, contact your Pearson representative for more information.

If you would like to purchase both the physical text and MyMathLab, search for:

0134307003 / 9780134307008 Trigonometry plus MyMathLab Student Access Kit

Package consists of:

0134217438 / 9780134217437	Trigonometry
0321431308 / 9780321431301	MyMathLab -- Glue-in Access Card
0321654064 / 9780321654069	MyMathLab Inside Star Sticker

Editorial Review

About the Author

Marge Lial (late) was always interested in math; it was her favorite subject in the first grade! Her desire to educate both her students and herself inspired the writing of numerous best-selling textbooks. Marge, who received Bachelor's and Master's degrees from California State University at Sacramento, was most recently affiliated with American River College. An avid reader and traveler, Marge's travel experiences often find their way into her books as applications, exercise sets, and feature sets. She was particularly interested in archeology. Trips to various digs and ruin sites produced some fascinating problems for her textbooks, involving such topics as the building of Mayan pyramids and the acoustics of ancient ball courts in the Yucatan.

When **John Hornsby** enrolled as an undergraduate at Louisiana State University, he was uncertain whether he wanted to study mathematics education or journalism. His ultimate decision was to become a teacher, and now after more than twenty-five years of teaching at the high school and university levels and fifteen years of writing mathematics textbooks, both of his goals have been realized. His love for both teaching and mathematics is evident in his passion for working with students and fellow teachers as well. His specific professional interests are recreational mathematics, mathematics history, and incorporating graphing calculators into the curriculum. John's personal life is busy, as he devotes time to his family (wife Gwen, and sons Chris, Jack, and Josh). He has been a rabid baseball fan all of his life. John's other hobbies include numismatics (the study of coins) and record collecting. He loves the music of the 1960s and has an extensive collection of the recorded works of Frankie Valli and the Four Seasons.

David Schneider has taught mathematics at universities for more than 34 years and has authored 36 books. He has an undergraduate degree in mathematics from Oberlin College and a PhD in mathematics from MIT. During most of his professional career, he was on the faculty of the University of Maryland—College Park. His hobbies include travel, dancing, bicycling, and hiking.

Callie Daniels has always had a passion for learning mathematics and brings that passion into the classroom with her students. She attended the University of the Ozarks on an athletic scholarship, playing both basketball and tennis. While there, she earned a Bachelor's degree in Secondary Mathematics Education as well as the NAIA Academic All-American Award. She has two Master's degrees: one in Applied Mathematics and Statistics from the University of Missouri—Rolla, the second in Adult Education from the University of Missouri—St. Louis. Her hobbies include watching her sons play sports, riding horses, fishing, shooting photographs, and playing guitar. Her professional interests include improving success in the community college mathematics sequence, using technology to enhance students' understanding of mathematics, and creating materials that support classroom teaching and student understanding.

Users Review

From reader reviews:

Sheila Rocha:

Why don't make it to be your habit? Right now, try to prepare your time to do the important work, like looking for your favorite reserve and reading a guide. Beside you can solve your long lasting problem; you can add your knowledge by the guide entitled Trigonometry (11th Edition). Try to make the book Trigonometry (11th Edition) as your pal. It means that it can to be your friend when you really feel alone and beside regarding course make you smarter than in the past. Yeah, it is very fortunated for you personally. The book makes you far more confidence because you can know every thing by the book. So , let me make new experience as well as knowledge with this book.

Joshua West:

As people who live in often the modest era should be revise about what going on or information even knowledge to make these people keep up with the era and that is always change and move ahead. Some of you maybe may update themselves by examining books. It is a good choice for you but the problems coming to anyone is you don't know what one you should start with. This Trigonometry (11th Edition) is our recommendation to help you keep up with the world. Why, since this book serves what you want and need in this era.

Caroline Edwards:

Do you really one of the book lovers? If yes, do you ever feeling doubt if you find yourself in the book store? Try and pick one book that you find out the inside because don't evaluate book by its include may doesn't work at this point is difficult job because you are frightened that the inside maybe not as fantastic as in the outside search likes. Maybe you answer can be Trigonometry (11th Edition) why because the wonderful cover that make you consider about the content will not disappoint you. The inside or content is fantastic as the outside as well as cover. Your reading 6th sense will directly direct you to pick up this book.

Alice Hille:

That guide can make you to feel relax. That book Trigonometry (11th Edition) was bright colored and of course has pictures on there. As we know that book Trigonometry (11th Edition) has many kinds or style. Start from kids until teens. For example Naruto or Investigator Conan you can read and think that you are the character on there. So , not at all of book are usually make you bored, any it can make you feel happy, fun and rest. Try to choose the best book for you personally and try to like reading this.
