Editorial Review

From the Back Cover

"Biostatistics for the Biological and Health Sciences" is the result of collaboration between the author of the #1 statistics book in the country and an expert in the biological sciences field." The major objective of this book is to provide a thorough, yet engaging introduction to statistics for students and professors in the biological, life, and health sciences. This text reflects the important features of a modern introductory statistics course and includes an abundance of real data and biological applications, and a variety of pedagogical components to help students succeed in their study of biological statistics. MARKET: It is the ideal introduction to statistics for students and professors in the biological, life, and health sciences.

About the Author

Allyn Washington was born and educated in Connecticut, where he also began teaching at Trinity College, his alma mater. He taught at Boise Junior College (now Boise State University) before joining the newly forming Dutchess Community College, in Poughkeepsie, New York, where he began writing "Basic Technical Mathematics." At the time, technical mathematics did not have a text that gave students the math they needed to successfully achieve their goals in the technical mathematics program. Al decided to write a book that specifically aligned itself with the technical programs these students were taking. He wanted his text to be flexible, allowing instructors to teach in ways that would most benefit their students. Through his vision and determination, Allyn Washington created the "Technical Mathematics" series. Mario F. Triola is a Professor Emeritus of Mathematics at Dutchess Community College, where he has taught statistics for over 30 years. Marty is the author of "Elementary Statistics, 10th Edition," "Elementary Statistics Using Excel," "Elementary Statistics Using the TI-83 84 Plus Calculator," and he is a co-author of "Biostatistics for the Biological and Health Sciences," "Statistical Reasoning for Everyday Life," and "Business Statistics." He has written several manuals and workbooks for technology supporting statistics education. Outside of the classroom, Marty has been a speaker at many conferences and colleges. His consulting work includes the design of casino slot machines and fishing rods, and he has worked with attorneys in determining probabilities in paternity lawsuits, identifying salary inequities based on gender, analyzing disputed election results, analyzing medical data, and analyzing medical school surveys. Marty has testified as an expert witness in New York State Supreme Court. The Text and Academic Authors Association has awarded Mario F. Triola a "Texty" for Excellence for his work on "Elementary Statistics." Ellena Reda is the Department Head of the Mathematics, Physical and Computer Sciences Department at Dutchess Community College in Poughkeepsie, NY. She began her career at DCC in 1988 as an adjunct instructor. Ellena received her Bachelor's degree in Mathematics at Marist College, her Master's degree in Mathematics/Education from the State University of New York at New Paltz, and an advanced graduate certificate in Educational Computing from the University at Stony Brook. She is the program coordinator at DCC for the Verizon Next Step Program, has served as the program's mathematics curriculum leader, and has taught a variety of courses in this technical program. Ellena is a member of the American Mathematical Association of Two Year Colleges. She was a writing team member of the NSF - AMATYC Math Works Project. She was the principal investigator for a National Science Foundation Computer Science, Engineering and Mathematics Scholarship (CSEMS) Grant and a team leader/teacher leader for the State Professional Development Collaborative, an NSF/ATE Grant. In spring 2005 she was named a Regional Teacher of the Year by the New York State Technology Education Association. Ellena has co-authored the "Excel Manual" that accompanies "Elementary Statistics," 8th, 9th and 10th editions written by Mario Triola. In her spare time

Ellena enjoys golfing, running, and reading. In 2003 she ran her first marathon to raise money for the AmericanStroke Association. Since then she has run 2 marathons and 3 half-marathons. She has three grown children and lives locally with her husband.

Users Review

From reader reviews:

John Augustine:

The book Biostatistics for the Biological and Health Sciences make you feel enjoy for your spare time. You can utilize to make your capable more increase. Book can to become your best friend when you getting anxiety or having big problem using your subject. If you can make studying a book Biostatistics for the Biological and Health Sciences to be your habit, you can get considerably more advantages, like add your current capable, increase your knowledge about several or all subjects. You are able to know everything if you like open up and read a e-book Biostatistics for the Biological and Health Sciences. Kinds of book are a lot of. It means that, science book or encyclopedia or others. So , how do you think about this book?

Juan Farley:

Now a day people who Living in the era where everything reachable by connect to the internet and the resources included can be true or not require people to be aware of each data they get. How people have to be smart in receiving any information nowadays? Of course the solution is reading a book. Reading through a book can help persons out of this uncertainty Information specifically this Biostatistics for the Biological and Health Sciences book since this book offers you rich facts and knowledge. Of course the details in this book hundred per-cent guarantees there is no doubt in it you may already know.

Shaun Richards:

Reading a guide tends to be new life style in this particular era globalization. With reading you can get a lot of information that may give you benefit in your life. Along with book everyone in this world can certainly share their idea. Books can also inspire a lot of people. A great deal of author can inspire all their reader with their story or even their experience. Not only the story that share in the publications. But also they write about advantage about something that you need example. How to get the good score toefl, or how to teach your young ones, there are many kinds of book that you can get now. The authors these days always try to improve their talent in writing, they also doing some analysis before they write on their book. One of them is this Biostatistics for the Biological and Health Sciences.

Clarissa Holland:

As a university student exactly feel bored to reading. If their teacher requested them to go to the library or even make summary for some book, they are complained. Just very little students that has reading's internal or real their passion. They just do what the trainer want, like asked to the library. They go to at this time there but nothing reading very seriously. Any students feel that reading is not important, boring in addition to can't see colorful photos on there. Yeah, it is being complicated. Book is very important for you. As we

know that on this era, many ways to get whatever we want. Likewise word says, many ways to reach Chinese's country. Therefore , this Biostatistics for the Biological and Health Sciences can make you truly feel more interested to read.
