Geophysical Exploration Technology: Applications in Lithological and Stratigraphic Reservoirs By Ming Li

Authored by one of the world's hydrocarbon exploration experts, **Geophysical Exploration Technology: Applications in Lithological and Stratigraphic Reservoirs** presents the latest technological advancements and cutting edge techniques in reservoir theory, research and exploration.

Stratigraphic and lithological reservoirs play a critical role in increasing the production from oil reserves and new hydrocarbon sources. Recent resource evaluations indicate that onshore stratigraphic and subtle reservoirs account for as much as 40% of the total remaining hydrocarbon sources globally. As a result, these reservoirs will be the most practical, potential and prevalent fields for long-lasting onshore exploration.

Intended as an aid in developing an understanding of the techniques of reservoir exploration, this book presents the latest and most practical methods and technology in oil and gas exploration. It can be used as a training book for lithological stratigraphic exploration and a reference for scientific and technological personnel in the oil and gas industry.

- Authored by one of the world's foremost experts in stratigraphic and lithological reservoir exploration who has more than 30 years of experience in research and instruction.
- Features more than 200 figures, illustrations, and working examples to aid the reader in retaining key concepts
- Presents the latest technological developments in reservoir exploration techniques
- Integrates theory and application, arming readers with a rigorous yet practical approach to hydrocarbon exploration in stratigraphic and lithological reservoirs

Editorial Review

Review

"... a valuable reference book for exploration geophysicists who are interested in learning more about interpretation from a stratigraphic and lithologic geology point of view."--**The Leading Edge, *Geophysical Exploration Technology***

About the Author

Li Ming is a master instructor in the geosciences and is now the president of Tarim Branch Institute of RIPED, Petrochina. He has authored dozens of related journal articles and several books including poroelasticity and hydrocarbon prediction and an industrial application guide of oil and gas exploration. Dr. Ming has more than 30 years of experience in stratigraphic reservoir research and exploration, with applications specific to the oil and gas industry.

Users Review

From reader reviews:

Mikel Davis:

As people who live in the modest era should be update about what going on or data even knowledge to make these keep up with the era which is always change and move forward. Some of you maybe will update themselves by reading through books. It is a good choice for you but the problems coming to a person is you don't know what kind you should start with. This Geophysical Exploration Technology: Applications in Lithological and Stratigraphic Reservoirs is our recommendation to help you keep up with the world. Why, since this book serves what you want and wish in this era.

Luther Keller:

Now a day people that Living in the era just where everything reachable by connect with the internet and the resources within it can be true or not require people to be aware of each details they get. How many people to be smart in getting any information nowadays? Of course the reply is reading a book. Studying a book can help folks out of this uncertainty Information mainly this Geophysical Exploration Technology: Applications in Lithological and Stratigraphic Reservoirs book because book offers you rich details and knowledge. Of course the knowledge in this book hundred percent guarantees there is no doubt in it everbody knows.

Yolanda Nitta:

Information is provisions for people to get better life, information presently can get by anyone with everywhere. The information can be a understanding or any news even a huge concern. What people must be consider any time those information which is within the former life are hard to be find than now could be taking seriously which one is appropriate to believe or which one the resource are convinced. If you find the unstable resource then you buy it as your main information it will have huge disadvantage for you. All of

those possibilities will not happen throughout you if you take Geophysical Exploration Technology: Applications in Lithological and Stratigraphic Reservoirs as the daily resource information.

Marianne Button:

Do you like reading a e-book? Confuse to looking for your best book? Or your book had been rare? Why so many issue for the book? But any people feel that they enjoy for reading. Some people likes examining, not only science book but also novel and Geophysical Exploration Technology: Applications in Lithological and Stratigraphic Reservoirs or even others sources were given understanding for you. After you know how the good a book, you feel want to read more and more. Science publication was created for teacher or maybe students especially. Those ebooks are helping them to bring their knowledge. In different case, beside science reserve, any other book likes Geophysical Exploration Technology: Applications in Lithological and Stratigraphic Reservoirs to make your spare time a lot more colorful. Many types of book like this.
