Winner, USA Books News Best Book Awards

CHILI HOT GMAT is based on a simple but powerful observation: Test-takers who score high on the GMAT exam do so primarily by understanding how to solve a finite number of the most important kinds of problems that appear on the GMAT. What are these important types of problems? The answer to this question is the basis of this book. In addition to comprehensive coverage of all six major problem types including Problem Solving, Data Sufficiency, Sentence Correction, Critical Reasoning, Reading Comprehension, and Analytical Writing, this manual also provides in-depth analysis of 194 multiple-choice problems and 6 essay questions. Each hand-selected problem comes with a classification, snapshot, and chili rating. *Classification* serves to identify each problem according to category or sub-category. *Snapshot* highlights why that particular problem was chosen, including the underlying problem-solving principle or strategic approach. *Chili rating* helps candidates gauge the estimated difficulty level of a given problem. A single chili indicates that the difficulty level of a given problem is "mild" (500 to 600 difficulty level), two chilies spell "hot" (600 to 700 difficulty level), and three chilies signal "very hot" (700 or above difficulty level). By studying problems of varying difficulty, candidates will learn not only to maintain discipline on easy but tricky problems but also to exercise flexibility when deciding on multiple approaches and time-saving shortcuts for use in tackling harder, more involved problems.

Editorial Review

Review

"Finally, a book that helps you master those learning skills that are critical to success on the GMAT."

--Linda B. Meehan Assistant Dean & Executive Director of Admissions, Columbia Business School

"Chili Hot GMAT has been invaluable in getting me fully prepared for the GMAT in less than a month and helping me to achieve a substantial 100-point improvement over my previous test result. Specifically, the 'work smart' approach makes it easy for the uninitiated or time-pressured test-taker to get up to speed quickly in all areas, from analytical writing to high school geometry. I highly recommend this book." ----

Geoffrey Chen, former consultant, McKinsey & Co., INSEAD graduate
