**Science and Technology in Nineteenth-Century America (The Greenwood Press Daily Life Through History Series: Science and Technology in Everyday Life)** By Todd Timmons

The 19th Century was a period of tremendous change in the daily lives of the average Americans. Never before had such change occurred so rapidly or and had affected such a broad range of people. And these changes were primarily a result of tremendous advances in science and technology. Many of the technologies that play such a central role in our daily life today were first invented during this great period of innovation?everything from the railroad to the telephone. These inventions were instrumental in the social and cultural developments of the time. The Civil War, Westward Expansion, the expansion and fall of slave culture, the rise of the working and middle classes and changes in gender roles?none of these would have occurred as they did had it not been for the science and technology of the time.

*Science and Technology in Nineteenth-Century America* chronicles this relationship between science and technology and the revolutions in the lives of everyday Americans. The volume includes a discussion of:

- Transportation?from the railroad and steamship to the first automobiles appearing near the end of the century.
- Communication?including the telegraph, the telephone, and the photograph
- Industrialization? how the growing factory system impacted the lives of working men and women
- Agriculture?how mechanical devices such as the McCormick reaper and applications of science forever altered how farming was done in the United States
- Exploration and navigations?the science and technology of the age was crucial to the expansion of the country that took place in the century, and

The book includes a timeline and a bibliography for those interested in pursuing further research, and over two dozen fascinating photos that illustrate the daily lives of Americans in the 19th Century Part of the Daily Life through History series, this title joins Science and Technology in Colonial America in a new branch of the series-titles specifically looking at how science innovations impacted daily life.

## **Editorial Review**

### **Review**

"Beginning with a chronology, Timmons introduces the era in which science began to produce technologies that revolutionized daily life. He traces developments in transportation; communications; work on and increasingly, off, the farm; household products; medicine; and exploration. The rise of US leadership in these fields and scientific and technical institutions is also covered. Period illustrations include an ad for women in bloomers riding a velocipede." - **Art Book News Annual**

"Few books are as approachable and historically focused as this, a welcome addition to the resources available to our students. For high school or middle school teachers wishing to incorporate more of this approach into their history or science classes, it is well worthwhile....highly recommend." - **NSTA Web site**

"[O]ffers a sweeping view of how science and innovations contributed to social and political changes in early 19th century America. Vast changes ranged from communication to transportation, agriculture and new navigation systems: both a timeline of events and a bibliography pair vintage black and white photos with analysis of changing technology's effects on 19th century America." - **MBR Bookwatch**

"A finely tuned study of the operation of science and technology in shaping the every day life of 19th century Americans. In organizing his work, Timmons is guided by his premise that a steady flow of inventions and innovations transformed America from a hand-manufacturing, slow-traveling, subsistence-farming society into a industrial-consumer nation, replete with brand names and energy saving conveniences, within the relatively short time period of 100 years or, that is, within a long life span. It is a meritorious theory and one to which the author brings substantial evidence in a well written narrative that is derived from his firm command of secondary sources on the subject. His bibliography runs to eight pages, his book is indexed, and he has included a useful time line of 19th century advances. Illustrations throughout the book supplement the text....[a] wonderful addition to the other 35 titles on the Series list of books" - **UA Fort Smith News**

### **About the Author**

**Todd Timmons** teaches mathematics, history of mathematics, and history of science at the University of Arkansas-Fort Smith. His professional interests include the history of American science and American mathematics.

## **Users Review**

### **From reader reviews:**

#### **Michael Cooke:**

Book will be written, printed, or outlined for everything. You can realize everything you want by a book. Book has a different type. We all know that that book is important thing to bring us around the world. Alongside that you can your reading talent was fluently. A e-book Science and Technology in Nineteenth-Century America (The Greenwood Press Daily Life Through History Series: Science and Technology in

Everyday Life) will make you to be smarter. You can feel a lot more confidence if you can know about everything. But some of you think in which open or reading a book make you bored. It isn't make you fun. Why they might be thought like that? Have you searching for best book or suited book with you?

**Lester Jaworski:**

What do you regarding book? It is not important along with you? Or just adding material when you need something to explain what yours problem? How about your time? Or are you busy man or woman? If you don't have spare time to do others business, it is give you a sense of feeling bored faster. And you have time? What did you do? Everyone has many questions above. They should answer that question since just their can do that. It said that about publication. Book is familiar in each person. Yes, it is proper. Because start from on guardería until university need that Science and Technology in Nineteenth-Century America (The Greenwood Press Daily Life Through History Series: Science and Technology in Everyday Life) to read.

**Johnny Powers:**

Playing with family in the park, coming to see the marine world or hanging out with good friends is thing that usually you might have done when you have spare time, after that why you don't try thing that really opposite from that. Just one activity that make you not experiencing tired but still relaxing, trilling like on roller coaster you already been ride on and with addition of knowledge. Even you love Science and Technology in Nineteenth-Century America (The Greenwood Press Daily Life Through History Series: Science and Technology in Everyday Life), you are able to enjoy both. It is very good combination right, you still need to miss it? What kind of hang type is it? Oh can happen its mind hangout men. What? Still don't get it, oh come on its called reading friends.

**Angel Jones:**

As we know that book is essential thing to add our information for everything. By a e-book we can know everything we want. A book is a pair of written, printed, illustrated or even blank sheet. Every year has been exactly added. This publication Science and Technology in Nineteenth-Century America (The Greenwood Press Daily Life Through History Series: Science and Technology in Everyday Life) was filled concerning science. Spend your spare time to add your knowledge about your scientific disciplines competence. Some people has different feel when they reading some sort of book. If you know how big good thing about a book, you can experience enjoy to read a book. In the modern era like today, many ways to get book that you just wanted.
