**Principles of GNSS, Inertial, and Multisensor Integrated Navigation Systems, Second Edition (Artech House Remote Sensing Library)** By Paul D. Groves

This newly revised and greatly expanded edition of the popular Artech House book Principles of GNSS, Inertial, and Multisensor Integrated Navigation Systems offers you a current and comprehensive understanding of satellite navigation, inertial navigation, terrestrial radio navigation, dead reckoning, and environmental feature matching. It provides both an introduction to navigation systems and an in-depth treatment of INS/GNSS and multisensor integration. The second edition offers a wealth of added and updated material, including a brand new chapter on the principles of radio positioning and a chapter devoted to important applications in the field. Other updates include expanded treatments of map matching, image-based navigation, attitude determination, acoustic positioning, pedestrian navigation, advanced GNSS techniques, and several terrestrial and short-range radio positioning technologies.

The book shows you how satellite, inertial, and other navigation technologies work, and focuses on processing chains and error sources. In addition, you get a clear introduction to coordinate frames, multi-frame kinematics, Earth models, gravity, Kalman filtering, and nonlinear filtering. Providing solutions to common integration problems, the book describes and compares different integration architectures, and explains how to model different error sources. You get a broad and penetrating overview of current technology and are brought up to speed with the latest developments in the field, including context-dependent and cooperative positioning.

DVD Included! Features eleven appendices, interactive worked examples, basic GNSS and INS Matlab® simulation software, and problems and exercises to help you master the material.

Contents: Preface. Introduction. Co-ordinate Frames, Kinematics, And The Earth. Kalman Filter-Based Estimation. Inertial Sensors. Inertial Navigation. Dead Reckoning, Attitude, and Height Measurement. Principles of Radio Positioning. GNSS: Fundamentals, Signals, and Satellites. GNSS: User Equipment Processing and Errors. GNSS: Advanced Techniques. Long- and Medium-Range Radio Navigation. Short-Range Positioning. Environmental Feature Matching. INS/GNSS Integration. INS Alignment, Zero Updates, and Motion Constraints. Multisensor Integrated Navigation. Fault Detection, Integrity Monitoring, and Testing. Applications and Future Trends. List of Symbols. List of Acronyms and Abbreviations. About the Author. Index.

Principles of GNSS, Inertial, and Multisensor Integrated Navigation Systems, Second Edition (Artech House Remote Sensing Library) By Paul D. Groves Bibliography

- Sales Rank: #278462 in Books
- Brand: imusti

- Published on: 2013-04-01
- Original language: English
- Number of items: 1
- Dimensions: 10.00" h x 7.00" w x 1.25" l, 3.35 pounds
- Binding: Hardcover
- 800 pages

#### **Editorial Review**

#### **Users Review**

From reader reviews:

#### **Robert Robertson:**

Book is to be different for every grade. Book for children until adult are different content. As it is known to us that book is very important normally. The book Principles of GNSS, Inertial, and Multisensor Integrated Navigation Systems, Second Edition (Artech House Remote Sensing Library) had been making you to know about other expertise and of course you can take more information. It is extremely advantages for you. The e-book Principles of GNSS, Inertial, and Multisensor Integrated Navigation Systems, Second Edition (Artech House Remote Sensing Library) is not only giving you far more new information but also for being your friend when you experience bored. You can spend your own personal spend time to read your publication. Try to make relationship together with the book Principles of GNSS, Inertial, and Multisensor Integrated Navigation Systems, Second Edition (Artech House Remote Sensing Library). You never experience lose out for everything if you read some books.

#### **Carmen Annunziata:**

Playing with family inside a park, coming to see the ocean world or hanging out with pals is thing that usually you have done when you have spare time, in that case why you don't try point that really opposite from that. Just one activity that make you not experience tired but still relaxing, trilling like on roller coaster you already been ride on and with addition of knowledge. Even you love Principles of GNSS, Inertial, and Multisensor Integrated Navigation Systems, Second Edition (Artech House Remote Sensing Library), you may enjoy both. It is good combination right, you still would like to miss it? What kind of hang type is it? Oh occur its mind hangout fellas. What? Still don't buy it, oh come on its referred to as reading friends.

#### **Cynthia Harvell:**

Many people spending their period by playing outside having friends, fun activity together with family or just watching TV all day long. You can have new activity to shell out your whole day by reading through a book. Ugh, do you consider reading a book can actually hard because you have to accept the book everywhere? It ok you can have the e-book, getting everywhere you want in your Smart phone. Like Principles of GNSS, Inertial, and Multisensor Integrated Navigation Systems, Second Edition (Artech House Remote Sensing Library) which is finding the e-book version. So , why not try out this book? Let's see.

#### Marc Medina:

That reserve can make you to feel relax. That book Principles of GNSS, Inertial, and Multisensor Integrated

Navigation Systems, Second Edition (Artech House Remote Sensing Library) was bright colored and of course has pictures on the website. As we know that book Principles of GNSS, Inertial, and Multisensor Integrated Navigation Systems, Second Edition (Artech House Remote Sensing Library) has many kinds or type. Start from kids until adolescents. For example Naruto or Private investigator Conan you can read and think you are the character on there. Therefore, not at all of book usually are make you bored, any it can make you feel happy, fun and rest. Try to choose the best book for yourself and try to like reading that will.
