Editorial Review

Amazon.com Review

Everything about *The Big Book of Dinosaurs* is off the charts--the size of the book itself, the elaborate two-page spreads, the color models, and even the oversized type. Children can experience the amazing powers of these prehistoric beasts--the jagged teeth of the ferocious meat eaters, the slashing claws of the Deinonychus, and the long-necked Barosaurus that could reach five-story-high treetops and may have had eight hearts. Yet, like the dinosaurs themselves, there is nothing threatening or intimidating about this highly informative book. The text is brief and succinct, only conveying facts that children find interesting. (There's even an index for quick searches of favorite dinos.) The lifelike illustrations give young readers a solid sense of what dinosaur fossils and skeletal systems look like as well as clear mental pictures of how these creatures appeared in "real-life" millions of years ago. (Ages 4 to 7) --*Gail Hudson*

From School Library Journal

PreSchool-Grade 3?One can't miss this book, not only because its gigantic, but also because it's gorgeous. The full-color photos of dinosaur replicas look so real that youngsters can almost count the scales on the backs of these beasts. The format?lots of pictures with short, quick captions?makes it a perfect read-aloud for young children, or a browsing item for older kids who want good illustrations with little text. There's not enough information for reports on individual species, but Wilkes does provide a good overview of how dinosaurs lived, camouflaged themselves, found their food, and generally survived. A great array of dinos that enhances the believability of these photogenic models.?Cathryn A. Camper, Minneapolis Public Library

Ages 4-7. This could be called *The Really Big Book of Dinosaurs* since this oversize volume is as awesome as the animals it showcases. The big, handsome photographs and drawings are just right for kid appeal. Full-color models and art are set up like a reptile family album on two-page spreads that feature armored dinosaurs, meat eaters, the biggest on earth, and the fast and fierce, to name a few. The text is simple--just an introductory sketch really. There's at least one interactive question per chapter to entice young readers to think and question. The usual dinosaurs are included (Tyrannosaurus, Stegosaurus) and the not so usual (Tuojangosaurus, Scelidosaurus). If you can make room on your shelves for one more dinosaur book, this might be a big item with little readers and viewers. *Denia Hester*
