**Java EE 7 with GlassFish 4 Application Server** By David R. Heffelfinger

**A practical guide to install and configure the GlassFish 4 application server and develop Java EE 7 applications to be deployed to this server**

## About This Book

- Install and configure GlassFish 4
- Covers all major Java EE 7 APIs and includes new additions such as JSON Processing
- Packed with clear, step-by-step instructions, practical examples, and straightforward explanations.

## Who This Book Is For

If you are a Java developers who wants to become proficient with Java EE 7, this book is ideal for you. Readers are expected to have some experience with Java and to have developed and deployed applications in the past, but don't need any previous knowledge of Java EE or J2EE.

## What You Will Learn

- Develop web-based applications using JavaServer Faces (JSF) 2.2
- Interact with databases via the Java Persistence API (JPA) 2.1
- Create SOAP and RESTful web services via JAX\_WS and JAX-RS APIs
- Develop Enterprise JavaBeans (EJBs), including session and message-driven beans
- Integrate enterprise application layers via Contexts and Dependency Injection (CDI) API
- Generate and parse JavaScript Object Notation (JSON) data via the JSON-P API
- Make WebSocket applications via the standard Java EE 7 WebSocket API

## In Detail

GlassFish is a free, open source application server which supports all the major Java features such as Enterprise JavaBeans, JPA, JavaServer Faces, JMS, RMI, JavaServer Pages, and servlets. It is the first Java EE 7 compliant application server. All major Java EE technologies and API's are covered in this version of Java. GlassFish server allows the user to work with the extensible, adaptable, and

lightweight Java EE 7 platform.

This book explores the installation and configuration of GlassFish, and then moves on to Java EE 7 application development, covering all major Java EE 7 APIs. It focuses on going beyond the basics to develop Java applications deployed to the GlassFish 4 application server. The book covers all major Java EE 7 APIs including JSF 2.2, EJB 3.2, CDI 1.1, the Java API for WebSocket, JAX-WS, JAX-RS and more.

The book also introduces JSON-P, the Java API for JSON (Javascript Object Notation) Processing. This advanced topic deals with how the two APIs are used to process JSON function, namely the Model API and the Streaming API. Apart from revisiting Java Server Faces (JSF), it explains why Facelets, the new features introduced in modern versions of JSF, are the preferred view technology over Java Server Pages (JSP)

The later chapters explore competing implementations of the WebSocket standard in Java, describing the updates in JMS; which aims to provide a simpler API and reduction in boilerplate code among a host of other features. Readers will also learn how to secure Java EE applications by taking advantage of GlassFish's built-in security features. Finally, we learn more about the RESTful web service development using the JAX-RS specification.

### **Editorial Review**

About the Author

#### **David R. Heffelfinger**

David R. Heffelfinger is the Chief Technology Officer at Ensode Technology, LLC, a software consulting firm based in the Greater Washington DC area. He has been architecting, designing, and developing software professionally since 1995. He has been using Java as his primary programming language since 1996. He has worked on many largescale projects for several clients including the U.S. Department of Homeland Security, Freddie Mac, Fannie Mae, and the U.S. Department of Defense. He has a master's degree in Software Engineering from Southern Methodist University. David is the Editorinchief of Ensode.net (<http://www.ensode.net>), a website on Java, Linux, and other technologies. David is a frequent speaker at Java conference such as JavaOne. You can follow David on Twitter, @ensode.

### **Users Review**

**From reader reviews:**

#### **Jose Campbell:**

Book is definitely written, printed, or highlighted for everything. You can recognize everything you want by a e-book. Book has a different type. As it is known to us that book is important point to bring us around the world. Close to that you can your reading talent was fluently. A e-book Java EE 7 with GlassFish 4 Application Server will make you to become smarter. You can feel far more confidence if you can know about every thing. But some of you think this open or reading a book make you bored. It is far from make you fun. Why they may be thought like that? Have you trying to find best book or ideal book with you?

#### **Donald Goodman:**

The actual book Java EE 7 with GlassFish 4 Application Server has a lot details on it. So when you make sure to read this book you can get a lot of benefit. The book was compiled by the very famous author. The author makes some research just before write this book. This kind of book very easy to read you can obtain the point easily after perusing this book.

#### **Cynthia Tso:**

On this era which is the greater particular person or who has ability in doing something more are more important than other. Do you want to become considered one of it? It is just simple approach to have that. What you need to do is just spending your time almost no but quite enough to experience a look at some books. Among the books in the top collection in your reading list is actually Java EE 7 with GlassFish 4 Application Server. This book which can be qualified as The Hungry Hills can get you closer in growing to be precious person. By looking upwards and review this publication you can get many advantages.

**Billy Doyle:**

Publication is one of source of understanding. We can add our know-how from it. Not only for students but additionally native or citizen will need book to know the up-date information of year in order to year. As we know those publications have many advantages. Beside we all add our knowledge, also can bring us to around the world. With the book Java EE 7 with GlassFish 4 Application Server we can consider more advantage. Don't someone to be creative people? To get creative person must like to read a book. Simply choose the best book that ideal with your aim. Don't possibly be doubt to change your life with that book Java EE 7 with GlassFish 4 Application Server. You can more pleasing than now.
