Editorial Review

"The book focuses on the broad categories in pulmonology and augments substantially the presentation of the previous edition. It would be fair to call this "the" reference in pulmonary medicine. I would consider it an essential resource to add to my personal library. The primary audience is pulmonologists, intensivists, and primary care internists, but nurses, respiratory therapists, and rehabilitators would undoubtedly find it selectively informative." - Joel C Seidman, MD(William Beaumont Hospitals), Doody's Review Service - 4 Stars
REVIEWS OF THE LAST EDITION: "Without a doubt, this text is a must for serious students of pulmonary medicine, whether in training, academic tenure, or mature clinical practice." ? JAMA REVIEW OF 4th EDITION: 'It goes without saying that this is a thorough, in depth review of chest medicine and as far as I could see, leaves nothing out. I was pleased to see this is a book for active physicians rather than researchers or scientists. It is aimed squarely at the specialists but generalists such as GPs or specialists in other but related disciplines would also find this book a good reference source. I also liked the principal that associated non respiratory problems are covered in detail. Take for example, Sarcoidosis, which has always been classified as a chest disease but is also a multi-system disease. The chapter on Sarcoidosis is an excellent review of the whole topic and not just the pulmonary aspects. In addition, there are excellent chapters on issues that you don't always find such as air pollution high altitude and diving medicine. Importantly the book is readable, and relevant to physicians and adopts a well rounded approach to informing the doctor what he or she needs to know. The depth of detail achieved is just right and this book has an encyclopedic feel to it. There are plenty of illustrations in the book but in the main, this is primarily a text based reference source.'-- June 2006 Dr Harry Brown www.univadis.com

From reader reviews:

David Nester:Nowadays reading books become more and more than want or need but also be a life style. This reading habit give you lot of advantages. The advantages you got of course the knowledge the rest of the information inside the book in which improve your knowledge and information. The knowledge you get based on what kind of book you read, if you want attract knowledge just go with education and learning books but if you want experience happy read one having theme for entertaining for example comic or novel. The Murray and Nadel's Textbook of Respiratory Medicine: 2-Volume Set, 5e (Textbook of Respiratory Medicine (Murray)) is kind of guide which is giving the reader unforeseen experience.

Denise Niemi:Playing with family in the park, coming to see the coastal world or hanging out with friends is thing that usually you might have done when you have spare time, subsequently why you don't try thing that really opposite from that. One activity that make you not sensation tired but still relaxing, trilling like on roller coaster you have been ride on and with addition associated with. Even you love Murray and Nadel's Textbook of Respiratory Medicine: 2-Volume Set, 5e (Textbook of Respiratory Medicine (Murray)), you could enjoy both. It is good combination right, you still wish to miss it? What kind of hangout type is it? Oh seriously its mind hangout guys. What? Still don't understand it, oh come on its called reading friends.

Lawrence Caulfield:That e-book can make you to feel relax. This book Murray and Nadel's Textbook of Respiratory Medicine: 2-Volume Set, 5e (Textbook of Respiratory Medicine (Murray)) was colourful and of course has pictures around. As we know that book Murray and Nadel's Textbook of Respiratory Medicine: 2-Volume Set, 5e (Textbook of Respiratory Medicine (Murray)) has many kinds or style. Start from kids until youngsters. For example Naruto or Investigator Conan you can read and think that you are the character on there. Therefore , not at all of book usually are make you bored, any it offers up you feel happy, fun and loosen up. Try to choose the best book in your case and try to like reading that will.

Julia Barr:What is your hobby? Have you heard that question when you got pupils? We believe that that

query was given by teacher to the students. Many kinds of hobby, Every individual has different hobby. And also you know that little person like reading or as reading become their hobby. You should know that reading is very important in addition to book as to be the thing. Book is important thing to increase you knowledge, except your own teacher or lecturer. You see good news or update concerning something by book. A substantial number of sorts of books that can you choose to adopt be your object. One of them is niagra Murray and Nadel's Textbook of Respiratory Medicine: 2-Volume Set, 5e (Textbook of Respiratory Medicine (Murray)).
