## New Consciousness for a New World: How to Thrive in Transitional Times and Participate in the Coming Spiritual Renaissance By Kingsley L. Dennis

A call for a paradigm shift in human thinking in recognition of the interconnectedness of all things--a new mind for a new world

- Explains how the instability of our current time is part of a larger cycle of human evolution that will soon turn toward renewal and regeneration
- Reveals how to participate in the process of conscious evolution to maintain resilience during these transitional times
- Examines new findings in quantum physics and quantum biology on the interconnectivity of all life and how to utilize this for conscious evolution

For centuries, indigenous wisdom traditions have talked of an epochal shift on the horizon, of a spiritual renaissance for the earth and her living family. Now the timelines are converging and the potential for an energetic “upgrade” for humanity is here, but first we must survive and evolve through the current period of transition.

Explaining that evolution is not a gradual process but more like a “shock to the system”--radical waves of transformation after a period of dormancy--author Kingsley Dennis reveals that we are currently undergoing an evolutionary leap and shows not only how to survive but also thrive in this period of global upheaval and change. Examining the nature of evolutionary cycles, he explains that the instability we are now experiencing--climate change, economic meltdowns, and increasing political polarization--is the convergence of complex systems that have reached a critical state. What we need in order to push through to the coming spiritual renaissance is a paradigm shift in human thinking and perception, a conscious evolution in recognition of the interconnectedness of all things--a new mind for a new world. Examining new findings in quantum physics and quantum biology on the interconnectivity of all life as well as opportunities for us to reawaken our slumbering souls, this book offers a glimpse of the new global society to come, a renewed humanity for the 21st century, and how each of us can best participate during the process of planetary transformation.

### Editorial Review

#### Review

“Dennis has provided a great service by turning his considered and considerable attention to illuminating the way forward for humanity’s evolutionary journey.” (*Julie Clayton, New Consciousness Review, November 2011*)

“Dennis penetrates the deep forces shaping our natural and social realities, noting that phenomena such as large cracks in Earth’s electromagnetic field; increasing solar radiation; DNA hypercommunication (data exchange on the DNA level using genetic code); and quantum coherence in biological organization portend an evolutionary “upgrade” already underway...With a steady focus on the positive potential for a new global society, Dennis maintains that participating in this transition relies on one foundational insight: the ultimate interconnection and interdependence of everything in a living field with a creative collective consciousness.” (*Publishers Weekly, November 2011*)

“He certainly makes you question your own beliefs and makes you think of things you’ve never even entertained before. I recommend it!” (*Monica P., Book Bargains and Previews, December 2011*)

“Examining new findings in quantum physics and quantum biology on the interconnectivity of all life, as well as opportunities for us to reawaken our slumbering souls, this book offers a glimpse into the new global society to come, a renewed humanity for the 21st century, and how each of us can best participate during the process of planetary transformation.” (*Aznet, January 2012*)

“This book is for anyone who wants to be in touch with the reality at hand and at the same time see the silver lining waiting for those of us who are prepared.” (*Rahasya Poe, Lotus Guide April 2012*)

“*New Consciousness for a New World* is a penetrating exploration of the potential for a new human civilization and consciousness to blossom during this time of profound global transition.” (*Duane Elgin, author of The Living Universe and Voluntary Simplicity*)
