Visualizing Data with Microsoft Power View (Database & ERP - OMG) By Brian Larson, Mark Davis, Dan English, Paul Purington

Create and Distribute High-impact Microsoft Power View Reports

Explore data in insightful new ways and transform the way your enterprise uses BI with help from this expert guide. *Visualizing Data with Microsoft Power View* shows how to effectively analyze and communicate complex information through elegant interactive reports. Discover how to create and populate tables, connect to databases, build multi-view reports in real-time, and publish your results to end-users. BI Semantic Model development and administration are also covered in this comprehensive volume.

- Launch Power View and navigate its user interface
- Load BI from SQL databases and external sources
- Build basic and multi-level table visualizations
- Develop card-, chart-, and matrix-based reports
- Incorporate auto-sizing, filtering, tiling, and slicing
- Securely distribute reports via SharePoint and PowerPivot
- Add functionality with hierarchies, perspectives, and KPIs
- Design, deploy, and support custom BI Semantic Models

DVD includes:

- More than four hours of video demonstrations
- A complete package of sample data?a Power View-optimized BI Semantic Model, a SQL Server database, and additional underlying data sources
- Comprehensive instructions for creating a learning environment, including Windows Server, SharePoint Server 2010, and Microsoft SQL Server 2012 with PowerPivot and Reporting Services SharePoint integration
- Six completed Power View Reports that include multiple views, visualizations, and performance dashboards
- BI Semantic Model with advanced extensions using DAX functions, including date and time, mathematical, logical, informational, and statistical functions
