Editorial Review

From the Back Cover

Human work is one of the main forces driving the development of our society, economy and quality of life. Statistics from the International Labour Organization indicate that there are currently 1.1 billion "economically active individuals" on five continents who on average spend more than half of their waking hours at work. This number entails an enormous potential impact for concepts, methods and tools of industrial engineering and ergonomics in the design of human work. This book focuses on the analysis, design and evaluation of complex work systems and work processes in engineering design, manufacturing and service. Its 46 scientific articles, contributed by internationally recognized researchers from 12 countries, provide unique insights into the latest developments and trends in these areas. The book is clearly organized and distinguishes seven levels of abstraction that emerge when human work is studied using different analytical approaches and different time scales.

About the Author

Christopher M. Schlick is Professor of Engineering at RWTH Aachen University and head of the Institute of Industrial Engineering and Ergonomics. He is also a member of the management board of the FGAN Research Institute for Communication, Information Processing and Ergonomics (FKIE). His research interests include modeling and simulation of work and business systems as well as the ergonomic design of human-machine interfaces.

Users Review

From reader reviews:

Colby McCray:

Inside other case, little men and women like to read book Industrial Engineering and Ergonomics: Visions, Concepts, Methods and Tools Festschrift in Honor of Professor Holger Luczak. You can choose the best book if you want reading a book. Given that we know about how is important a new book Industrial Engineering and Ergonomics: Visions, Concepts, Methods and Tools Festschrift in Honor of Professor Holger Luczak. You can add expertise and of course you can around the world by way of a book. Absolutely right, due to the fact from book you can recognize everything! From your country right up until foreign or abroad you will find yourself known. About simple matter until wonderful thing it is possible to know that. In this era, we can open a book or maybe searching by internet gadget. It is called e-book. You need to use it when you feel uninterested to go to the library. Let's learn.

Thomas Berg:

Now a day people that Living in the era just where everything reachable by interact with the internet and the resources inside it can be true or not need people to be aware of each facts they get. How many people to be

smart in receiving any information nowadays? Of course the reply is reading a book. Looking at a book can help individuals out of this uncertainty Information particularly this Industrial Engineering and Ergonomics: Visions, Concepts, Methods and Tools Festschrift in Honor of Professor Holger Luczak book because book offers you rich facts and knowledge. Of course the knowledge in this book hundred per cent guarantees there is no doubt in it you may already know.

Janice Saucier:

A lot of people always spent their particular free time to vacation or go to the outside with them friends and family or their friend. Do you realize? Many a lot of people spent many people free time just watching TV, or perhaps playing video games all day long. If you wish to try to find a new activity here is look different you can read the book. It is really fun for yourself. If you enjoy the book which you read you can spent 24 hours a day to reading a reserve. The book Industrial Engineering and Ergonomics: Visions, Concepts, Methods and Tools Festschrift in Honor of Professor Holger Luczak it doesn't matter what good to read. There are a lot of those who recommended this book. We were holding enjoying reading this book. In case you did not have enough space bringing this book you can buy typically the e-book. You can m0ore quickly to read this book from the smart phone. The price is not too costly but this book offers high quality.

Micah Clark:

Reading a reserve make you to get more knowledge from the jawhorse. You can take knowledge and information from the book. Book is published or printed or outlined from each source that filled update of news. Within this modern era like currently, many ways to get information are available for you. From media social just like newspaper, magazines, science reserve, encyclopedia, reference book, novel and comic. You can add your understanding by that book. Isn't it time to spend your spare time to spread out your book? Or just trying to find the Industrial Engineering and Ergonomics: Visions, Concepts, Methods and Tools Festschrift in Honor of Professor Holger Luczak when you required it?
