Java SOA Cookbook: SOA Implementation Recipes, Tips, and Techniques
By Eben Hewitt

Java SOA Cookbook offers practical solutions and advice to programmers charged with implementing a service-oriented architecture (SOA) in their organization. Instead of providing another conceptual, high-level view of SOA, this cookbook shows you how to make SOA work. It's full of Java and XML code you can insert directly into your applications and recipes you can apply right away.

The book focuses primarily on the use of free and open source Java Web Services technologies -- including Java SE 6 and Java EE 5 tools -- but you'll find tips for using commercially available tools as well.

Java SOA Cookbook will help you:

- Construct XML vocabularies and data models appropriate to SOA applications
- Build real-world web services using the latest Java standards, including JAX-WS 2.1 and JAX-RS 1.0 for RESTful web services
- Integrate applications from popular service providers using SOAP, POX, and Atom
- Create service orchestrations with complete coverage of the WS-BPEL (Business Process Execution Language) 2.0 standard
- Improve the reliability of SOAP-based services with specifications such as WS-Reliable Messaging
- Deal with governance, interoperability, and quality-of-service issues

The recipes in *Java SOA Cookbook* will equip you with the knowledge you need to approach SOA as an integration challenge, not an obstacle.

Editorial Review

About the Author

Eben Hewitt is a Principal on the architecture team at a multi-billion dollar national retail company, where he has been focused on designing and building their Service Oriented Architecture. He has worked in IT for ten years, working on large-scale web and SOA integration projects, distributed software, and messaging systems. Hewitt is the author of four previous programming books, several industry articles, and is a contributor to the O'Reilly book 97 Things Every Software Architect Should Know, edited by Richard Monson-Haefel. He is a popular speaker at industry conferences and local user groups.

Users Review

From reader reviews:

Molly Marquis:

Information is provisions for folks to get better life, information these days can get by anyone at everywhere. The information can be a knowledge or any news even a huge concern. What people must be consider when those information which is inside former life are hard to be find than now is taking seriously which one would work to believe or which one the resource are convinced. If you obtain the unstable resource then you obtain it as your main information you will see huge disadvantage for you. All of those possibilities will not happen inside you if you take Java SOA Cookbook: SOA Implementation Recipes, Tips, and Techniques as the daily resource information.

Marsha Bridges:

The book Java SOA Cookbook: SOA Implementation Recipes, Tips, and Techniques has a lot details on it. So when you make sure to read this book you can get a lot of gain. The book was published by the very famous author. The writer makes some research previous to write this book. This particular book very easy to read you can obtain the point easily after scanning this book.

Mary Quinn:

Beside this Java SOA Cookbook: SOA Implementation Recipes, Tips, and Techniques in your phone, it might give you a way to get more close to the new knowledge or data. The information and the knowledge you are going to got here is fresh through the oven so don't end up being worry if you feel like an old people live in narrow commune. It is good thing to have Java SOA Cookbook: SOA Implementation Recipes, Tips, and Techniques because this book offers to you readable information. Do you sometimes have book but you seldom get what it's facts concerning. Oh come on, that would not happen if you have this within your hand. The Enjoyable agreement here cannot be questionable, just like treasuring beautiful island. Use you still want to miss that? Find this book and also read it from today!

Clara Radtke:

What is your hobby? Have you heard that question when you got learners? We believe that that concern was given by teacher to the students. Many kinds of hobby, Every individual has different hobby. And you know that little person similar to reading or as examining become their hobby. You need to understand that reading is very important and also book as to be the issue. Book is important thing to incorporate you knowledge, except your own personal teacher or lecturer. You discover good news or update regarding something by book. A substantial number of sorts of books that can you decide to try be your object. One of them are these claims Java SOA Cookbook: SOA Implementation Recipes, Tips, and Techniques.
