**The Stanford Mathematics Problem Book: With Hints and Solutions (Dover Books on Mathematics)** By G. Polya, J. Kilpatrick

This volume features a complete set of problems, hints, and solutions based on Stanford University's well-known competitive examination in mathematics. It offers high school and college students an excellent mathematics workbook of rigorous problems that will assist in developing and cultivating their logic and probability skills. These 20 sets of intriguing problems test originality and insight rather than routine competence. They involve theorizing and verifying mathematical facts; examining the results of general statements; discovering that highly plausible conjectures can be incorrect; solving sequences of subproblems to reveal theory construction; and recognizing "red herrings," in which obvious relationships among the data prove irrelevant to solutions. Hints for each problem appear in a separate section, and a final section features solutions that outline the appropriate procedures. Ideal for teachers seeking challenging practice math problems for their gifted students, this book will also help students prepare for mathematics, science, and engineering programs. Mathematics buffs of all ages will also find it a source of captivating challenges.

### **Editorial Review**

#### About the Author

George Pólya (1887–1985) was a professor of mathematics at Stanford University who made lasting contributions to combinatorics, number theory, numerical analysis, and probability theory. He was also very well-known for his work in mathematics education. In his later days, Dr. Pólya spent considerable effort to document the methods that people use to solve problems, and to describe how problem-solving should be taught and learned. He wrote four books on the subject.

### **Users Review**

#### **From reader reviews:**

##### **Eleanor Hayes:**

People live in this new morning of lifestyle always try to and must have the free time or they will get lot of stress from both daily life and work. So , whenever we ask do people have spare time, we will say absolutely indeed. People is human not really a huge robot. Then we question again, what kind of activity are there when the spare time coming to anyone of course your answer will probably unlimited right. Then ever try this one, reading textbooks. It can be your alternative in spending your spare time, typically the book you have read is actually The Stanford Mathematics Problem Book: With Hints and Solutions (Dover Books on Mathematics).

##### **Gregory Morrow:**

You could spend your free time to learn this book this book. This The Stanford Mathematics Problem Book: With Hints and Solutions (Dover Books on Mathematics) is simple to bring you can read it in the park your car, in the beach, train and soon. If you did not possess much space to bring the printed book, you can buy typically the e-book. It is make you better to read it. You can save the book in your smart phone. Thus there are a lot of benefits that you will get when you buy this book.

##### **Nettie Powers:**

That guide can make you to feel relax. This particular book The Stanford Mathematics Problem Book: With Hints and Solutions (Dover Books on Mathematics) was bright colored and of course has pictures on the website. As we know that book The Stanford Mathematics Problem Book: With Hints and Solutions (Dover Books on Mathematics) has many kinds or variety. Start from kids until young adults. For example Naruto or Investigation company Conan you can read and think you are the character on there. Therefore , not at all of book are usually make you bored, any it makes you feel happy, fun and loosen up. Try to choose the best book for you and try to like reading in which.

**Edmund Morrisette:**

What is your hobby? Have you heard that will question when you got college students? We believe that that problem was given by teacher on their students. Many kinds of hobby, Every person has different hobby. And you also know that little person including reading or as reading through become their hobby. You should know that reading is very important and book as to be the factor. Book is important thing to incorporate you knowledge, except your personal teacher or lecturer. You will find good news or update regarding something by book. Numerous books that can you choose to adopt be your object. One of them is niagra The Stanford Mathematics Problem Book: With Hints and Solutions (Dover Books on Mathematics).
