Biology By Peter Raven, George Johnson, Kenneth Mason, Jonathan Losos, Susan Singer

NOTE: This ISBN does not Include Access code. This is a Standalone book

Committed to Excellence in the Landmark Tenth Edition. This edition continues the evolution of Raven & Johnson's Biology. The author team is committed to continually improving the text, *keeping the student and learning foremost*. We have integrated new pedagogical features to expand the students' learning process and enhance their experience in the ebook. This latest edition of the text maintains the clear, accessible, and engaging writing style of past editions with the solid framework of pedagogy that highlights an emphasis on evolution and scientific inquiry that have made this a leading textbook for students majoring in biology and have been enhanced in this landmark Tenth edition. This emphasis on the organizing power of evolution is combined with an integration of the importance of cellular, molecular biology and genomics to offer our readers a text that is student friendly and current.

Our author team is committed to producing the best possible text for both student and faculty. The lead author, **Kenneth Mason, University of Iowa**, has taught majors biology at three different major public universities for more than fifteen years. **Jonathan Losos, Harvard University**, is at the cutting edge of evolutionary biology research, and **Susan Singer, Carleton College**, has been involved in science education policy issues on a national level. All three authors bring varied instructional and content expertise to the tenth edition of *Biology*.

Editorial Review

About the Author

Peter H. Raven, Ph.D., is director of the Missouri Botanical Garden and Engelmann professor of botany at Washington University at St. Louis. He oversees the garden's internationally recognized research program in tropical botany--one of the world's most active in the study and conservation of imperiled tropical habitats. Raven's botanical research and work in the area of tropical conservation have earned him numerous honors and awards, including a MacArthur Fellowship. He has written 17 textbooks and more than 400 articles, and he is a member of the National Academy of Science and the National Research Council.

Susan Singer is the Laurence McKinley Gould Professor of the Natural Sciences in the department of biology at Carleton College in Northfield, Minnesota, where she has taught introductory biology, plant biology, genetics, plant development, and developmental genetics for 20 years. Her research interests are focused on the development and evolution of flowering plants. Singer has authored numerous scientific publications on plant development, contributed chapters to developmental biology texts, and is actively involved with the education efforts of several professional societies. She received the American Society of Plant Biology's Excellence in Teaching Award, serves on the National Academies Board on Science Education, and chaired the NRC study committee that produced America's Lab Report.

Kenneth A. Mason received his undergraduate degree in Molecular Biology from the University of Washington, worked at UC Berkeley, then pursued his PhD in Genetics at UC Davis. He has taught Genetics, Microbial Genetics, Microbiology, Advanced Molecular Genetics, Introductory Biology, and a Genetics Laboratory that he designed.

Jonathan Losos is a Monique and Philip Lehner Professor for the Study of Latin America in the Department of Organismic and Evolutionary Biology and Curator of Herpetology at the Museum of Comparative Zoology at Harvard University. Losos's research has focused on studying patterns of adaptive radiation and evolutionary diversification in lizards. The recipient of several awards including the prestigious Theodosius Dobzhansky and David Starr Jordan Prizes for outstanding young evolutionary biologists, Losos has published more than 100 scientific articles.

George B. Johnson, Ph.D., is a professor of biology at Washington University in St. Louis and a professor of genetics at the university's School of Medicine. He is a prolific author of life science texts and curriculum products in a variety of media. New to his list of works are the Explorations of Human Biology CD-ROM and the textbook Human Biology, both offered by Wm. C. Brown Publishers. Johnson is acknowledged as an authority on population genetics and evolution variability, and he has published more than 50 research papers dealing with these and related topics. Visitors to the St. Louis Zoo can appreciate Johnson's work in the Living World, the educational center of which he is the founding director.

Users Review

From reader reviews:

Cornell Warren:

The feeling that you get from Biology will be the more deep you searching the information that hide in the

words the more you get enthusiastic about reading it. It does not mean that this book is hard to recognise but Biology giving you excitement feeling of reading. The article author conveys their point in selected way that can be understood through anyone who read this because the author of this reserve is well-known enough. That book also makes your personal vocabulary increase well. Making it easy to understand then can go along with you, both in printed or e-book style are available. We suggest you for having this Biology instantly.

Dorothy Delarosa:

The book untitled Biology is the publication that recommended to you to learn. You can see the quality of the book content that will be shown to you actually. The language that creator use to explained their way of doing something is easily to understand. The article writer was did a lot of exploration when write the book, to ensure the information that they share to you personally is absolutely accurate. You also could possibly get the e-book of Biology from the publisher to make you much more enjoy free time.

Joseph Yancey:

Your reading 6th sense will not betray you, why because this Biology e-book written by well-known writer who really knows well how to make book which might be understand by anyone who read the book. Written with good manner for you, still dripping wet every ideas and creating skill only for eliminate your hunger then you still question Biology as good book not just by the cover but also with the content. This is one book that can break don't evaluate book by its handle, so do you still needing yet another sixth sense to pick this!? Oh come on your examining sixth sense already said so why you have to listening to a different sixth sense.

Darlene Kidd:

Within this era which is the greater individual or who has ability to do something more are more valuable than other. Do you want to become among it? It is just simple approach to have that. What you have to do is just spending your time not very much but quite enough to experience a look at some books. One of several books in the top record in your reading list is actually Biology. This book which is qualified as The Hungry Inclines can get you closer in becoming precious person. By looking up and review this publication you can get many advantages.
