Editorial Review

Review

RADIOGRAPHY IN VETERINARY TECHNOLOGY

LISA M LAVIN

The fourth edition of this practical text on the subject of radiography is a compilation of the three previous editions, together with the welcome addition of a chapter on digital radiography.

This text is written by a veterinary technician, with contributions from two associate professors in radiology, and draws on her considerable experience as a teacher in this field.

As such, it is clearly laid out and presented. The text also makes excellent use of the 506 accompanying illustrations, many of which are reproduced in very high quality.

This excellent textbook is very readable and provides immediate access to the information required by veterinary professionals seeking to produce good quality radiographic images.

As a university student exactly feel bored to be able to reading. If their teacher inquired them to go to the library or make summary for some publication, they are complained. Just very little students that has reading's soul or real their pastime. They just do what the instructor want, like asked to go to the library. They go to right now there but nothing reading significantly. Any students feel that reading through is not important, boring and can't see colorful photos on there. Yeah, it is for being complicated. Book is very important for you personally. As we know that on this time, many ways to get whatever we want.
