Power Sources and Supplies: World Class Designs By Marty Brown

Newnes has worked with Marty Brown, a leader in the field of power design to select the very best design-specific material from the Newnes portfolio. Marty selected material for its timelessness, its relevance to current power supply design needs, and its real-world approach to design issues. Special attention is given to switching power supplies and their design issues, including component selection, minimization of EMI, toroid selection, and breadboarding of designs. Emphasis is also placed on design strategies for power supplies, including case histories and design examples. This is a book that belongs on the workbench of every power supply designer!

*Marty Brown, author and power supply design consultant, has personally selected all content for its relevance and usefulness

*Covers best design practices for switching power supplies and power converters

*Emphasis is on pragmatic solutions to commonly encountered design problems and tasks

Editorial Review

About the Author

Marty Brown is the author of the Power Supply Cookbook and Practical Switching Power Supply Design. He earned his amateur radio license at the age of 11 and has had electronics as a hobby throughout his life. He graduated cum laude from Drexel University in 1974. His electronic design history includes underwater acoustics with the department of the Navy, airborne weather radar design (digital and SMPS), a satellite CODEC, and process control equipment. He was previously with Motorola Semiconductor as a principle application engineer, where he defined more than eight semiconductor products in the power conversion market and received two patents. He later started his own electronics consulting firm where he designed products from satellite power systems to power-related integrated circuits for many semiconductor companies. He is presently working in the field of digitally-controlled power supplies with Microchip Technologies. He has eight children, five of whom are adopted. His wife is an internationally known writer and speaker in the area of inter-racial adoption and related issues. He presently lives in Scottsdale, Arizona.

Users Review

From reader reviews:

Lisa Auyeung:

What do you think about book? It is just for students because they are still students or the idea for all people in the world, exactly what the best subject for that? Only you can be answered for that concern above. Every person has distinct personality and hobby per other. Don't to be pressured someone or something that they don't desire do that. You must know how great along with important the book Power Sources and Supplies: World Class Designs. All type of book can you see on many solutions. You can look for the internet methods or other social media.

Gary Lane:

Book is to be different for each and every grade. Book for children until adult are different content. To be sure that book is very important for us. The book Power Sources and Supplies: World Class Designs was making you to know about other expertise and of course you can take more information. It is rather advantages for you. The e-book Power Sources and Supplies: World Class Designs is not only giving you a lot more new information but also to be your friend when you truly feel bored. You can spend your personal spend time to read your e-book. Try to make relationship with all the book Power Sources and Supplies: World Class Designs. You never experience lose out for everything when you read some books.

Geneva Orta:

Information is provisions for people to get better life, information currently can get by anyone at everywhere. The information can be a understanding or any news even an issue. What people must be consider any time those information which is within the former life are difficult to be find than now is taking seriously which one is acceptable to believe or which one the resource are convinced. If you get the unstable resource then

you obtain it as your main information you will see huge disadvantage for you. All of those possibilities will not happen inside you if you take Power Sources and Supplies: World Class Designs as the daily resource information.

Clarence Williams:

What is your hobby? Have you heard that question when you got college students? We believe that that problem was given by teacher for their students. Many kinds of hobby, Every person has different hobby. And you know that little person just like reading or as studying become their hobby. You have to know that reading is very important and also book as to be the factor. Book is important thing to incorporate you knowledge, except your own teacher or lecturer. You will find good news or update about something by book. A substantial number of sorts of books that can you choose to adopt be your object. One of them is Power Sources and Supplies: World Class Designs.
