**Alternative Energy Systems: Design and Analysis with Induction Generators, Second Edition (Power Electronics and Applications Series)** By M. Godoy Simões, Felix A. Farret

**New perspectives on using induction generators in alternative energy technologies**

Durable and cost-effective, induction power generators have undergone numerous improvements that make them an increasingly attractive option for renewable energy applications, particularly for wind and hydropower generation systems. From fundamental concepts to the latest technologies, **Alternative Energy Systems: Design and Analysis with Induction Generators, Second Edition** provides detailed and accurate coverage of all aspects related to the design, operation, and overall analysis of such systems.

Placing a greater emphasis on providing clear, precise, and succinct explanations, this second edition features new, revised, and updated content as well as figures, tables, equations, and examples. Each chapter introduces a multi-step, chapter-length problem relating the material to a real application. The solution appears at the end of the chapter, along with additional practice problems and references.

Totally re-written and updated chapter covering doubly-fed induction generators **Alternative Energy Systems** provides the tools and expertise for advanced students and professionals in electrical, mechanical, civil, and environmental engineering involved in the development of power plants. ";

Editorial Review About the Author

Colorado School of Mines, Golden, USA UFSM-CT-DPEE, Santa Maria, Brazil Users Review **From reader reviews:**

Connie King: The book Alternative Energy Systems: Design and Analysis with Induction Generators, Second Edition (Power Electronics and Applications Series) can give more knowledge and also the precise product information about everything you want. Exactly why must we leave a good thing like a book Alternative Energy Systems: Design and Analysis with Induction Generators, Second Edition (Power Electronics and Applications Series)? Some of you have a different opinion about book. But one aim that will book can give many facts for us. It is absolutely right. Right now, try to closer with your book. Knowledge or data that you take for that, you may give for each other; you are able to share all of these. Book Alternative Energy Systems: Design and Analysis with Induction Generators, Second Edition (Power Electronics and Applications Series) has simple shape but you know: it has great and big function for you. You can look the enormous world by available and read a book. So it is very wonderful.

Frances Hairston: Reading a guide tends to be new life style in this era globalization. With studying you can get a lot of information that may give you benefit in your life. The authors nowadays always try to improve their ability in writing, they also doing some research before they write to the book. One of them is this Alternative Energy Systems: Design and Analysis with Induction Generators, Second Edition (Power Electronics and Applications Series).

George Walker: Reading can called mind hangout, why? Because if you find yourself reading a book especially book entitled Alternative Energy Systems: Design and Analysis with Induction Generators, Second Edition (Power Electronics and Applications Series) your mind will drift away trough every dimension, wandering in every single aspect that maybe unidentified for but surely will end up your mind friends. Imaging each and every word written in a e-book then become one form conclusion and explanation this maybe you never get just before. The Alternative Energy Systems: Design and Analysis with Induction Generators, Second Edition (Power Electronics and Applications Series) giving you a different experience more than blown away your head but also giving you useful info for your better life within this era. So now let us show you the relaxing pattern the following is your body and mind are going to be pleased when you are finished examining it, like winning a. Do you want to try this extraordinary investing spare time activity?
