**Fixed Effects Regression Models (Quantitative Applications in the Social Sciences)** By Paul D. Allison

This book demonstrates how to estimate and interpret fixed-effects models in a variety of different modeling contexts: linear models, logistic models, Poisson models, Cox regression models, and structural equation models. Both advantages and disadvantages of fixed-effects models will be considered, along with detailed comparisons with random-effects models. Written at a level appropriate for anyone who has taken a year of statistics, the book is appropriate as a supplement for graduate courses in regression or linear regression as well as an aid to researchers who have repeated measures or cross-sectional data.

### **Editorial Review**

#### **About the Author**

**Paul D. Allison, Ph.D.**, is Professor of Sociology at the University of Pennsylvania where he teaches graduate courses in methods and statistics. He is also the founder and president of Statistical Horizons LLC which offers short courses on a wide variety of statistical topics.

After completing his doctorate in sociology at the University of Wisconsin, he did postdoctoral study in statistics at the University of Chicago and the University of Pennsylvania. He has published eight books and more than 60 articles on topics that include linear regression, log-linear analysis, logistic regression, structural equation models, inequality measures, missing data, and survival analysis.

Much of his early research focused on career patterns of academic scientists. At present, his principal research is on methods for analyzing longitudinal data, especially those for determining the causes and consequences of events, and on methods for handling missing data.

A former Guggenheim Fellow, Allison received the 2001 Lazarsfeld Award for distinguished contributions to sociological methodology. In 2010 he was named a Fellow of the American Statistical Association. He is also a two-time winner of the American Statistical Association's award for "Excellence in Continuing Education."

### **Users Review**

#### **From reader reviews:**

##### **Martin Sanchez:**

As people who live in typically the modest era should be change about what going on or info even knowledge to make these keep up with the era and that is always change and move ahead. Some of you maybe will update themselves by looking at books. It is a good choice to suit your needs but the problems coming to a person is you don't know which you should start with. This Fixed Effects Regression Models (Quantitative Applications in the Social Sciences) is our recommendation to make you keep up with the world. Why, because this book serves what you want and want in this era.

##### **Latrice Miller:**

Nowadays reading books become more and more than want or need but also turn into a life style. This reading practice give you lot of advantages. Advantages you got of course the knowledge even the information inside the book in which improve your knowledge and information. The details you get based on what kind of book you read, if you want have more knowledge just go with education books but if you want feel happy read one having theme for entertaining including comic or novel. Typically the Fixed Effects

Regression Models (Quantitative Applications in the Social Sciences) is kind of publication which is giving the reader unstable experience.

**Bryce Adams:**

Reading a reserve can be one of a lot of exercise that everyone in the world adores. Do you like reading book so. There are a lot of reasons why people like it. First reading a publication will give you a lot of new info. When you read a reserve you will get new information due to the fact book is one of numerous ways to share the information or maybe their idea. Second, reading a book will make you more imaginative. When you reading a book especially tale fantasy book the author will bring one to imagine the story how the character types do it anything. Third, you are able to share your knowledge to other people. When you read this Fixed Effects Regression Models (Quantitative Applications in the Social Sciences), it is possible to tells your family, friends as well as soon about yours e-book. Your knowledge can inspire different ones, make them reading a publication.

**Teresa Obannon:**

People live in this new moment of lifestyle always aim to and must have the free time or they will get great deal of stress from both day to day life and work. So , whenever we ask do people have extra time, we will say absolutely of course. People is human not really a huge robot. Then we question again, what kind of activity are there when the spare time coming to anyone of course your answer may unlimited right. Then do you try this one, reading textbooks. It can be your alternative with spending your spare time, the actual book you have read is usually Fixed Effects Regression Models (Quantitative Applications in the Social Sciences).
