Editorial Review

Review

When a deer crashes through a windshield, it is only the first of many inexplicable (or "wtf") moments experienced during a long night in New York City for six teens from a prep school involved in a drug sale destined for disaster. That the "drugs" are really generic aspirin and that several want out of the business makes the evening even more surreal. Relationships shift and change as much as the narrators and the time frame -- each chapter identifies the narrator and the date and time, and there are some flashbacks and peeks ahead to keep readers on their toes. The patchwork image on the cover hints at plot points, and teens will be eager to see how Lerangis stitches them all together. The title reflects the hip and foul language of the very believable, smart urban teens, and the event-filled chases through the streets of Manhattan will remind readers of Rachel Cohn and David Levithan's *Nick & Norah's Infinite Playlist* (2006). An epilog provides details about what's next for each of these memorable characters. -- Cindy Dobrez --Booklist, October 15, 2009
