

## MyMathLab: Student Access Kit

By Hall H Pearson Education

MyMathLab: Student Access Kit By Hall H Pearson Education

This access kit will provide you with a code to get into MyMathLab, a personalized interactive learning environment, where you can learn mathematics and statistics at your own pace and measure your progress. In order to use MyMathLab, you will need a CourseID provided by your instructor; MyMathLab is not a self-study product and does require you to be in an instructor-led course. This product is for the national MyMathLab access kit. If your school has a custom MyMathLab course the printed access card will not work. MyMathLab includes:

Interactive tutorial exercises: MyMathLab's homework and practice exercises are correlated to the exercises in the relevant textbook, and they regenerate algorithmically to give you unlimited opportunity for practice and mastery. Most exercises are free-response and provide an intuitive math symbol palette for entering math notation. Exercises include guided solutions, sample problems, and learning aids for extra help at point-of-use, and they offer helpful feedback when students enter incorrect answers.

**eBook with multimedia learning aids:** MyMathLab courses include a full eBook with a variety of multimedia resources available directly from selected examples and exercises on the page. You can link out to learning aids such as video clips and animations to improve their understanding of key concepts.

**Study plan for self-paced learning:** MyMathLab's study plan helps you monitor your own progress, letting you see at a glance exactly which topics you need to practice. MyMathLab generates a personalized study plan for you based on your test results, and the study plan links directly to interactive, tutorial exercises for topics you haven't yet mastered. You can regenerate these exercises with new values for unlimited practice, and the exercises include guided solutions and multimedia learning aids to give students the extra help they need.

**NOTE:** Access codes can only be used one time. If you purchased a used book that claimed that it included an access code, your code may already have been used and it will not work again. In this case, you must purchase a new access code.

#### **Editorial Review**

Review

What are instructors are saying about MyMathLab?

"We use the MyMathLab software and are extremely pleased with the content and the technical support. We could not use this approach without it! Eighty-two percent of the students in the pilot actually admitted that it helped them learn the mathematics." from *Phoebe Rouse, LSU* 

"The increase in student success is 27%. Students that would have been lost with a nontransferable 'D' or an 'F' are now passing the course." from a *Community College in the Chicago area* 

"My exam averages and course pass rates our up. Students are actively engaged in practicing math, ask more and better questions, and enjoy the learning process. They appreciate the instant feedback and aren't satisfied until they get 100 percent on the homework assignments. When it comes time to register for the next class, most students who have done both lecture-based and MyMathLab hybrid classes, seek out the MyMathLab sections. They feel a real sense of accomplishment because they recognize and can take credit for the role they've played in their success." from *Jill Shirley, Cal Poly Pomona* 

"After teaching with MML I wouldn't want to go back to the traditional way of teaching Math. MML stimulates better student/teacher interaction in a lab setting. It tracks and grades homework for you. And it's a great tutorial for students when they get stuck." from *Sheila Pisa, Riverside Community College (CA)* 

"MML is one of the most reliable of all online Math programs." from *Sheila Pisa, Riverside Community College (CA)* 

"I absolutely love MML. I believe whole-heartedly that it has made a definite improvement in my students' grades and understanding level. I have fewer students dropping out of the courses I am teaching using this method than in the past - before MML. I recommend it to everybody I know!!" from *Susan Hutchinson*, *Florence Darlington Technical College*

About the Author

#### **Users Review**

#### From reader reviews:

#### **Eric Lowe:**

What do you about book? It is not important with you? Or just adding material if you want something to explain what your own problem? How about your spare time? Or are you busy person? If you don't have spare time to try and do others business, it is gives you the sense of being bored faster. And you have free time? What did you do? All people has many questions above. They should answer that question because just their can do that. It said that about publication. Book is familiar in each person. Yes, it is suitable. Because start from on kindergarten until university need this particular MyMathLab: Student Access Kit to read.

#### **Nola Schroeder:**

Reading a book to become new life style in this calendar year; every people loves to study a book. When you go through a book you can get a large amount of benefit. When you read publications, you can improve your knowledge, simply because book has a lot of information onto it. The information that you will get depend on what sorts of book that you have read. If you need to get information about your study, you can read education books, but if you act like you want to entertain yourself look for a fiction books, this kind of us novel, comics, and also soon. The MyMathLab: Student Access Kit offer you a new experience in reading through a book.

#### Deidra Hird:

Many people spending their time period by playing outside with friends, fun activity together with family or just watching TV the entire day. You can have new activity to invest your whole day by reading a book. Ugh, think reading a book really can hard because you have to accept the book everywhere? It ok you can have the e-book, having everywhere you want in your Mobile phone. Like MyMathLab: Student Access Kit which is finding the e-book version. So, try out this book? Let's observe.

#### **Gerardo Roney:**

Is it a person who having spare time then spend it whole day by means of watching television programs or just lying down on the bed? Do you need something totally new? This MyMathLab: Student Access Kit can be the answer, oh how comes? A fresh book you know. You are and so out of date, spending your spare time by reading in this completely new era is common not a geek activity. So what these guides have than the others?
