### **Editorial Review**

#### **Review**

"David Grand is one of the most important and effective psychological trauma therapists now practicing, and his development of Brainspotting is a very important leap forward in helping people resolve trauma. Brainspotting is a remarkable, sophisticated, flexible addition to the therapeutic toolkit of any psychotherapist. I know because I use it regularly, and find that, combined with the psychoanalytic approaches I normally practice, the results are astonishingly helpful. Using it, one becomes amazed at the extent to which our traumas can be detected in our ordinary facial and eye reflexes, and how, by using these windows to inner mental states, many traumas and symptoms can be rapidly relieved. Grand writes clearly, and the cases, dramatic as they are, are not exaggerated.

—NORMAN DOIDGE MD, FRCPC, Author of *The Brain That Changes Itself*

"All I can say about Brainspotting is, "THIS STUFF WORKS!" Thank you for everything you have given my life with your genius and discoveries!"

—EARL POTEET, L.C.S.W., M.S.W.
