Fishes of the World By Joseph S. Nelson

Considered a classic guide to fish classification and identification, it is the only book which uses recent findings in arranging all major fish groups worldwide. Covers 445 families in which over 21,700 species of living fishes are recognized. Adopts a synthetic approach to classification and presents groups in evolutionary order. This edition updates all families to reflect progress and changes in the field.

Editorial Review

From the Back Cover

"Of all the literature I use while preparing field guides for the Food and Agriculture Organization of the United Nations, Nelson's *Fishes of the World* is, by far, the one I refer to most often. [This] book is a standard reference . . . I continue to use it extensively in the ichthyology courses I teach, particularly in laboratory sessions."

—Kent E. Carpenter Old Dominion University

"*Fishes of the World* is a unique and essential resource for anyone seriously interested in the diversity and evolution of fishes. The family accounts provide quick summaries of current knowledge on all groups of living fishes and many key fossil taxa. It is a required work for every student in my laboratory."

—William E. Bemis Kingsbury Director of Shoals Marine Laboratory, Cornell University

"Only classics are known by the single name of their author, and certainly [Nelson's book] has for four editions been such a book for all those who seek an accessible, up-to-date, readable reference on fish classification. Once again, Nelson presents a balanced view of the sometimes tumultuous, but ever-exciting, study of the phylogenetic relationships and classification of fishes. In doing so, Nelson makes an excellent case for organismal biology, highlighting the many and varied morphological characters we use to diagnose fish taxa and differentiate among the 515 families of living species."

—Lynne R. Parenti Curator of Fishes and Research Scientist, National Museum of Natural History, Smithsonian Institution

Fishes of the World, Fourth Edition is the updated edition of a true classic in the field. A unique presentation of a modern, cladistically based classification of all the major living and fossil fish groups, this indispensable reference helps scientists and others identify and classify specimens, make familial connections, understand the evolution of fishes, and springboard into further research.

The taxonomy of fishes presented includes the anatomical characteristics, distribution, common and scientific names, and phylogenetic relationships for all 515 families of living fishes. Packed with representative species drawings and information on phylogenetic relationships, this informative Fourth Edition features:

- Both fossil and extant species
- More than 500 illustrations
- Fully vetted scientific and common names
- An extensive bibliography

About the Author

JOSEPH S. NELSON, PHD, is Professor Emeritus of Biological Sciences in the Department of Biological Sciences at the University of Alberta in Edmonton, Canada. He is also Chair of the Joint ASIH-AFS Committee on Names of Fishes.

Users Review

From reader reviews:

Vera Forde:

Have you spare time to get a day? What do you do when you have much more or little spare time? Yep, you can choose the suitable activity with regard to spend your time. Any person spent their spare time to take a go walking, shopping, or went to the actual Mall. How about open or perhaps read a book entitled Fishes of the World? Maybe it is to become best activity for you. You recognize beside you can spend your time with your favorite's book, you can better than before. Do you agree with its opinion or you have other opinion?

Michael Campbell:

This book untitled Fishes of the World to be one of several books in which best seller in this year, here is because when you read this publication you can get a lot of benefit in it. You will easily to buy this book in the book retail outlet or you can order it via online. The publisher with this book sells the e-book too. It makes you quicker to read this book, because you can read this book in your Touch screen phone. So there is no reason to you to past this book from your list.

Jacqueline Bull:

Spent a free time to be fun activity to accomplish! A lot of people spent their sparettime with their family, or their own friends. Usually they doing activity like watching television, gonna beach, or picnic within the park. They actually doing same task every week. Do you feel it? Do you wish to something different to fill your own personal free time/ holiday? May be reading a book may be option to fill your free of charge time/ holiday. The first thing you ask may be what kinds of publication that you should read. If you want to attempt look for book, may be the publication untitled Fishes of the World can be very good book to read. May be it is usually best activity to you.

Sara Kelly:

Beside this Fishes of the World in your phone, it could possibly give you a way to get nearer to the new knowledge or details. The information and the knowledge you can got here is fresh in the oven so don't be worry if you feel like an outdated people live in narrow small town.
