Motion Coordination for VTOL Unmanned Aerial Vehicles: Attitude Synchronisation and Formation Control (Advances in Industrial Control)

By Abdelkader Abdessameud, Abdelhamid Tayebi

Motion Coordination for VTOL Unmanned Aerial Vehicles develops new control design techniques for the distributed coordination of a team of autonomous unmanned aerial vehicles. In particular, it provides new control design approaches for the attitude synchronization of a formation of rigid body systems. In addition, by integrating new control design techniques with some concepts from nonlinear control theory and multi-agent systems, it presents a new theoretical framework for the formation control of a class of under-actuated aerial vehicles capable of vertical take-off and landing. Several practical problems related to the systems' inputs, states measurements, and restrictions on the interconnection topology between the aerial vehicles in the team are addressed. Worked examples with sufficient details and simulation results are provided to illustrate the applicability and effectiveness of the theoretical results discussed in the book.

The material presented is primarily intended for researchers and industrial engineers from robotics, control engineering and aerospace communities. It also serves as a complementary reading for graduate students involved in research related to flying robotics, aerospace, control of under-actuated systems, and nonlinear control theory

Editorial Review

Users Review

From reader reviews:

Patricia Watts:

Now a day individuals who Living in the era everywhere everything reachable by talk with the internet and the resources inside can be true or not require people to be aware of each information they get. How individuals to be smart in having any information nowadays? Of course the answer then is reading a book. Reading a book can help folks out of this uncertainty Information particularly this Motion Coordination for VTOL Unmanned Aerial Vehicles: Attitude Synchronisation and Formation Control (Advances in Industrial Control) book since this book offers you rich information and knowledge. Of course the details in this book hundred per-cent guarantees there is no doubt in it you probably know this.

Edna Brooks:

The book Motion Coordination for VTOL Unmanned Aerial Vehicles: Attitude Synchronisation and Formation Control (Advances in Industrial Control) will bring one to the new experience of reading some sort of book. The author style to elucidate the idea is very unique. In the event you try to find new book to see, this book very suited to you. The book Motion Coordination for VTOL Unmanned Aerial Vehicles: Attitude Synchronisation and Formation Control (Advances in Industrial Control) is much recommended to you to see. You can also get the e-book through the official web site, so you can quicker to read the book.

James Chavez:

This Motion Coordination for VTOL Unmanned Aerial Vehicles: Attitude Synchronisation and Formation Control (Advances in Industrial Control) is great e-book for you because the content which is full of information for you who else always deal with world and get to make decision every minute. That book reveal it details accurately using great organize word or we can point out no rambling sentences within it. So if you are read it hurriedly you can have whole data in it. Doesn't mean it only gives you straight forward sentences but challenging core information with beautiful delivering sentences. Having Motion Coordination for VTOL Unmanned Aerial Vehicles: Attitude Synchronisation and Formation Control (Advances in Industrial Control) in your hand like obtaining the world in your arm, data in it is not ridiculous just one. We can say that no book that offer you world inside ten or fifteen moment right but this publication already do that. So , this can be good reading book. Hi Mr. and Mrs. active do you still doubt that will?

Mary Bessler:

Is it you who having spare time in that case spend it whole day simply by watching television programs or just lying down on the bed? Do you need something totally new? This Motion Coordination for VTOL Unmanned Aerial Vehicles: Attitude Synchronisation and Formation Control (Advances in Industrial Control) can be the solution, oh how comes? A book you know. You are thus out of date, spending your time by reading in this brand new era is common not a geek activity. So what these textbooks have than the others?
