Evidence-Based Neonatal Infections By David Isaacs

Evidence-Based Neonatal Infections is expertly written by David Isaacs, an experienced author renowned for his knowledge in both pediatric infections and evidence-based medicine. It critically analyses the evidence for decision making in neonatal infections.

Evidence-Based Neonatal Infections

- * The first evidence-based text on neonatal infections
- * Provides practical guidance where evidence is poor
- * Complements David Isaacs' *Evidence-Based Pediatric Infectious Diseases* (9781405148580)

Practical and evidence-based, *Evidence-Based Neonatal Infections* is designed to help the clinician with day-to-day decisions on the care of newborn babies with possible, probable or proven infections. It considers clinical questions relevant to neonatologists, analysing the evidence carefully and providing recommendations for optimum management of neonatal infectious diseases, whilst reflecting on:

- Efficacy and safety
- Antibiotic resistance
- Cost effectiveness
- Adverse effects
- Ethical considerations

Evidence-Based Neonatal Infections provides a unique reference for neonatologists, pediatricians, trainees, specialist nurses; general practitioners, microbiologists, infection control doctors, and all staff in neonatal units.

Editorial Review

Review

“This is a comprehensive, brief, and very clinical approach to neonatal infections with an international flavor.” (*Doody's*, 12 December 2014)

“The book is a workable length and is best targeted at the neonatal fellow or pediatric resident with an interest in neonatology. It should be widely used in the resident’s work space as a quick definitive guide to management of neonatal infections and as a tool for discussion of the wisdom of starting therapeutic agents and optimal approaches to the diagnostic challenges of the sick neonate.” (*Clinical Infectious Diseases*, 22 August 2014)

From the Back Cover

Evidence-Based Neonatal Infections is expertly written by David Isaacs, an experienced author renowned for his knowledge in both pediatric infections and evidence-based medicine. It critically analyses the evidence for decision making in neonatal infections.
