Editorial Review

From the Back Cover

The author of *Mind of the Dolphin* and *Center of the Cyclone* tells the story of his astonishing discoveries - from his early experiments mapping the brains of monkeys and communication with dolphins to his awesome breakthroughs with consciousness expanding drugs and isolation tanks. His revelations in *The Scientist* are staggering - his latest report on the "solid state conspiracy", on communication with extraterrestrials and the imperative of dolphin/human dialog will grip the reader with its sense of cosmic vision. This expanded edition of *The Scientist* contains "bubbles" of consensus reality - text and photos - in the hyperspace narrative. It includes an introduction by Timothy Leary, an afterward by Burgess Meredith, biographical and bibliographic information. The third edition has an update on John Lilly's work with Human/Dolphin communication and the results of recent reintroduction of captive dolphins and other cetaceans to the wild.
