Editorial Review

Review

"Taking a fresh new approach to information on baked products this exciting new book looks beyond the perceived notions of how foods from the bakery are categorised to explore the underlying themes that link the products. This book is a valuable practical resource for all food scientists and food technologists within bakery companies, ingredient suppliers and general food research companies." *Food Engineering and Ingredients, June 2007*

"Baked Products: Science, Technology and Practice is a valuable practical resource for all food scientists and food technologists within bakery companies, ingredient suppliers and general food companies. The book will be an important addition for librarian and research establishments." *Beverage & Food World, September 2007*

"Provide[s] a more detailed understanding to underpin the development of new processes and products. Few can be more qualified to do this than Stan Cauvain and Linda Young. Together they have over 65 years' experience in the industry with a formidable record of publications on baking technology." *Food Science and Technology*

From the Back Cover

Taking a fresh approach to information on baked products, this exciting new book from industry consultants Cauvain and Young looks beyond the received notions of how foods from the bakery are categorised to explore the underlying themes which link the products in this commercially important area of the food industry.

First establishing an understanding of the key characteristics which unite existing baked product groups, the authors move on to discuss product development and optimisation, providing the reader with coverage of:

- Key functional roles of the main bakery ingredients
- Ingredients and their influences
- Heat transfer and product interactions
- Opportunities for future product development

Baked Products is a valuable practical resource for all food scientists and food technologists within bakery companies, ingredient suppliers and general food companies. Libraries in universities and research establishments where food science and technology is studied and taught will find the book an important addition to their shelves.

Users Review

From reader reviews:

Lela Hird:

Exactly why? Because this Baked Products: Science, Technology and Practice is an unordinary book that the inside of the e-book waiting for you to snap the item but latter it will jolt you with the secret the idea inside. Reading this book adjacent to it was fantastic author who all write the book in such remarkable way makes the content inside easier to understand, entertaining means but still convey the meaning completely. So , it is good for you for not hesitating having this ever again or you going to regret it. This excellent book will give you a lot of positive aspects than the other book get such as help improving your proficiency and your critical thinking method. So , still want to hesitate having that book? If I ended up you I will go to the e-book store hurriedly.

Steven Weathers:

Is it an individual who having spare time then spend it whole day through watching television programs or just telling lies on the bed? Do you need something totally new? This Baked Products: Science, Technology and Practice can be the answer, oh how comes? A fresh book you know. You are therefore out of date, spending your spare time by reading in this completely new era is common not a nerd activity. So what these books have than the others?

Lori Suda:

On this era which is the greater person or who has ability to do something more are more precious than other. Do you want to become considered one of it? It is just simple method to have that. What you must do is just spending your time little but quite enough to have a look at some books. On the list of books in the top record in your reading list is usually Baked Products: Science, Technology and Practice. This book that is certainly qualified as The Hungry Inclines can get you closer in turning into precious person. By looking right up and review this publication you can get many advantages.

Amy Quist:

As a college student exactly feel bored in order to reading. If their teacher expected them to go to the library or even make summary for some publication, they are complained. Just small students that has reading's heart or real their hobby. They just do what the educator want, like asked to the library. They go to generally there but nothing reading seriously. Any students feel that examining is not important, boring as well as can't see colorful photos on there. Yeah, it is being complicated. Book is very important in your case. As we know that on this age, many ways to get whatever you want. Likewise word says, many ways to reach Chinese's country. So , this Baked Products: Science, Technology and Practice can make you sense more interested to read.
