Handbook of Neurocritical Care: Second Edition From Springer

Neurocritical care as a subspecialty has grown rapidly over the last two decades and has reached a level of distinct maturity with the advent of newer monitoring, diagnostic and therapeutic modalities in a variety of brain and spinal cord injury paradigms. Handbook of Neurocritical Care, Second Edition remains true to the operative tenet that "time is brain" and rapid diagnosis and therapeutic interventions in these challenging patients cannot be overemphasized. The second edition of this important Handbook again serves as a quick, practical reference for those involved in the care of critically ill neurological and neurosurgical patients. The care provided to this subset of critically ill patients continues to be multidisciplinary and includes care rendered from colleagues in emergency medical services, emergency medicine, neurology, neurosurgery, anesthesiology, critical care, nursing and physician assistance. Fully updated, all of the chapters again consist of easy-to-read, bulleted points followed by a list of Key Points and important references allowing for rapid access to vital information critical for fast and timely decision making. The first section covers a myriad of important general principles while the second section addresses the major diagnostic categories of neurocritical care with several new topics; these include, for example, neuroleptic malignant syndrome and malignant hyperthermia, meningitis and encephalitis, and intraventricular hemorrhage. Readers will find the algorithms, tables, and illustrations throughout the book not o

Editorial Review

Review

From the reviews of the second edition:

“This is the second edition of an outline for care of patients with acute neurological illness. ... Trainees in neuroscience and critical care as well as other caregivers are an appropriate audience for this work originating from leading neuroscience programs in the U.S. ... an effective update from the first edition. References and content have been expanded and revised. The obvious strength is the clear presentation of neurological issues” (David J. Dries, Doody’s Review Service, June, 2011)

From the Back Cover

Neurocritical care as a subspecialty has grown rapidly over the last two decades and has reached a level of distinct maturity with the advent of newer monitoring, diagnostic and therapeutic modalities in a variety of brain and spinal cord injury paradigms. Handbook of Neurocritical Care, Second Edition remains true to the operative tenet that "time is brain," and rapid diagnosis and therapeutic interventions in these challenging patients cannot be overemphasized. The second edition of this important Handbook again serves as a quick, practical reference for those involved in the care of critically ill neurological and neurosurgical patients. The care provided to this subset of critically ill patients continues to be multidisciplinary and includes care rendered from colleagues in emergency medical services, emergency medicine, neurology, neurosurgery, anesthesiology, critical care, nursing and physician assistance. Fully updated, all of the chapters again consist of easy-to-read, bulleted points followed by a list of Key Points and important references allowing for rapid access to vital information critical for fast and timely decision making. The first section covers a myriad of important general principles while the second section addresses the major diagnostic categories of neurocritical care with several new topics; these include, for example, neuroleptic malignant syndrome and malignant hyperthermia, meningitis and encephalitis, and intraventricular hemorrhage. Readers will find the algorithms, tables, and illustrations throughout the book not only useful but truly invaluable in facilitating fast and accurate decision making. Accessible and comprehensive, Handbook of Neurocritical Care, Second Edition again fills a vital need by providing readers with a succinct and practical approach to the management of critically ill neurological and neurosurgical patients.

Users Review

From reader reviews:

Michelle Pacheco:

The book Handbook of Neurocritical Care: Second Edition will bring you to the new experience of reading any book. The author style to explain the idea is very unique. When you try to find new book you just read, this book very acceptable to you. The book Handbook of Neurocritical Care: Second Edition is much recommended to you to read. You can also get the e-book in the official web site, so you can quickly to read the book.

Michele Sexton:

Reading a reserve tends to be new life style with this era globalization. With studying you can get a lot of information which will give you benefit in your life. Together with book everyone in this world can easily share their idea. Textbooks can also inspire a lot of people. Lots of author can inspire their very own reader with their story or even their experience. Not only the story that share in the books. But also they write about advantage about something that you need example of this. How to get the good score toefl, or how to teach your children, there are many kinds of book that you can get now. The authors on earth always try to improve their talent in writing, they also doing some analysis before they write on their book. One of them is this Handbook of Neurocritical Care: Second Edition.

James Stevens:

The particular book Handbook of Neurocritical Care: Second Edition has a lot associated with on it. So when you make sure to read this book you can get a lot of advantage. The book was published by the very famous author. This articles author makes some research before write this book. This book very easy to read you can obtain the point easily after reading this book.

Homer Holmes:

That e-book can make you to feel relax. This specific book Handbook of Neurocritical Care: Second Edition was bright colored and of course has pictures on there. As we know that book Handbook of Neurocritical Care: Second Edition has many kinds or category. Start from kids until teenagers. For example Naruto or Investigator Conan you can read and think that you are the character on there. So , not at all of book are usually make you bored, any it offers you feel happy, fun and loosen up. Try to choose the best book for yourself and try to like reading that will.
